# SUBJECT INDEX
## VOLUME 53

Acclimation period
  mineralization of organic chemicals
    aquatic environments, 791
Acetaldehyde
  production by *Z. mobilis*, 2815
  *S. cerevisiae* growth inhibition
    autoconditioning factor, 33
Acetate
  *Bacillus* spp.
    isolation from soil, 1263
  butyrate-degrading triculture
    metabolism kinetics, 434
  *C. thermoautotrophicum*
    chemolithotrophic growth, 1902
  *E. coli*
    growth and proline excretion, 2445
  *M. ivanovii*
    auxotrophic mutant isolation, 1387
  *M. soehngenii* VNBF
    methanogenic activity, 2978
  metabolism by a *Pseudomonas* sp.
    nuclear magnetic resonance spectroscopy, 156
  methanogenesis in granular sludge
    inhibition by long-chain fatty acids, 403
  *Methanosarcina* spp.
    degradation, 83
  microbial metabolism
    study in sediments, 371
*Acetivibrio cellulolyticus*
  microcrystalline cellulose
    hydrolysis, 304
*Acetobacterium woodii*
  one-carbon-compound utilization
    characteristics, 471
Acetogenesis
  hot spring cyanobacterial mats
    fermentation products, 2343
Acetoin
  *L. plantarum*
    conversion from pyruvate, 1798
Acetylene
  gas-utilizing enzymes
    effects, 298
  production by methanogens, 1604
Acetylxylan esterase
  properties, 2831
*Acholeplasma laidlawii*
  Nonadecafluoro-*n*-decanoic acid
    cytotoxic and cytolytic activity, 1236
Acid environments
  *A. viscosus*
    acid tolerance, 2124
  anaerobic iron reduction
    magnetite formation, 2610
  arginine deiminase system
    bacterial adaptation, 198
  *L. casei*
    acid tolerance, 2124
  strip mine lakes
    algal and bacterial activities, 2069
Acid rain
  *T. ferrooxidans*
    enumeration in a population of acidophilic bacteria, 660
Acidification
  streams
    bacterial communities, 337
  strip mine lakes
    algal and bacterial activities, 2069
*Acinetobacter calcoaceticus*
  drag reduction, 2269
  emulsan
    reconstitution of activity, 440
  growth on crude oil
    plasmid involvement, 1918
*Acinetobacter* sp. strain GJ70
  degradation of halogenated alkanes, 561
*Acremonium alabamense*
  potato processing wastes
    microbial biomass protein, 284
Acrylonitrile butadiene styrene
  renal dialysis water system
    bacterial colonization, 1322
    endotoxin content, 1322
*Actinomyces viscosus*
  acid tolerance
    membrane ATPases, 2124
Actinomycetes
  *Frankia* sp. strain FaC1 genes
    isolation and characterization, 2321
  *Frankia* spp.
    protoplast formation and regeneration, 53
  *Micromonospora* spp.
    transfection, 2544
Activated carbon filters
  survival of selected bacterial species, 777
Activated sludge
  dimethyl disulfide-forming bacteria
    identification, 1541
Adaptation
  aquatic microbial communities
    $Hg^{2+}$ stress, 2725
  aquifer microbial communities
    xenobiotic compounds, 2212
  bacterioplankton
    seasonal variations, 2282
  monosubstituted phenol biodegradation
    aquatic environments, 1496
Adhesion
  electrophoretic mobility as measure, 1898
  role of cell wall hydrophobicity, 1893, 1898
Adsorption
  DNA
    sand, 2948
A-ELISA
  hepatitis A virus
    detection in estuarine samples, 1192
*Aeromonas caviae*
  grocery store produce
    enumeration and characterization, 249
*Aeromonas hydrophila*
  grocery store produce
    enumeration and characterization, 249
*Aeromonas salmonicida*
  isolates from diseased fish
    major common extracellular proteins, 722
Aerosols
  airborne microorganisms
    estimation of concentrations, 1580
  immunized calves
    challenge hypersensitivity, 1721
  *L. pneumophila*
    inactivation, 2983
  *S. atra*
    aerosolized conidia, 1370
  sampling methods
    comparison, 99
Aflatoxins
  *A. flavus*
    drought-stressed peanut kernels, 270
    stimulation by *H. burtonii* and *B. amyloliquefaciens*, 1142
  *A. parasiticus*
    $B_2$ biosynthesis, 2804
    distribution alteration, 2303
  aflatoxin-producing molds
    screening by UV photography, 230
  averufanin
    aflatoxin $B_1$ precursor, 14
  $B_1$
    enzyme activities, 1711
  contamination of maize
    Bhagalpur, India, 1391
  precursor in *A. parasiticus*
    *O*-methylsterigmatocystin, 1028
  preharvest contamination of developing cottonseed and corn kernels
    effect of moisture and substrate variation, 584
  production by *Aspergillus* spp.
    phosphine, 2328
  regulation of biosynthesis
    cellular energy status, 1224
  screening, 1593
*Agaricus bisporus*
  hyphae-bacteria interactions
    scanning electron microscopy, 1132
*Agaricus bitorquis*
  DNA restriction fragment length polymorphisms, 816
*Agaricus brunnescens*
  DNA restriction fragment length polymorphisms, 816
Agrobacteria
  biovars
    isolation, 717
*Agrobacterium* spp.
  biovars
    isolation, 717
  identification
    complementary methodologies, 2660
*Agrobacterium tumefaciens*
  attachment to carrot cells
    auxin, 2574
    plasmid pSa, 2574
  grapevine tumor isolates
    characterization, 1338
  population heterogeneity
    *Populus* L. galls, 655
Airborne microorganisms
  downwind concentrations
    estimation, 1580
  sampling methods
    comparison, 99
Ajoene
  antifungal activity, 615
Alanine dehydrogenase
  *P. freudenreichii* subsp. *shermanii*
    properties, 1885
Albumin
  dietary supplement
    protein degradation by ruminal microorganisms, 751
*Alcaligenes denitrificans*
  4-chloro-, 4-bromo-, and 4-iodobenzoate
    hydrolytic dehalogenation, 810

2,4-dichlorobenzoate
reductive dechlorination to 4-chlorobenzoate, 810
*Alcaligenes eutrophus*
aroclors
degradation, 1094
polychlorinated biphenyl metabolism
novel mechanisms, 1103
polychlorinated biphenyls
degradation, 1094
Alcohol oxidase
*C. boidinii*
production, 1812
Alcohols
*C. beijerinckii*
alcohol dehydrogenases, 697
*C. butylicum*
alcohol dehydrogenases, 697
Alder swamp
denitrification, 2554
methanogenesis, 2554
sulfate reduction, 2554
Alfalfa
green juice
microbial coagulation, 2206
*R. meliloti*
symbiotic bacteroid differentiation, 1947
Algae
*C. reinhardtii*
cell wall degradation, 1701
*Chlorella* spp.
polysaccharides and chelation, 2953
Alginate
*Vibrio* spp.
attachment to stainless steel, 1175
Alkaloids
*Claviceps* spp.
parasexual processes, 70
Alkanes
*Acinetobacter* sp. strain GJ70
degradation of halogenated alkanes, 561
Alkenes
bacterial utilization, 2903
Alkyl amines
*A. versicolor*
metabolism, 246
*Alteromonas haloplanktis*
metabolizable-compound transport
variation in $Na^+$ requirements, 1487
Aluminum
soybean bacteroids and seeds
localizations, 2548
Amines
*A. versicolor*
metabolism, 246
Amino acids
*Methanococcus* spp.
nutrition, 2373
Ammonia
arginine deiminase system
bacterial adaptation, 198
Ammonium
anoxic marine sediments
sources, 2435
molybdate-inhibited sediments
production, 2435
Amylase
soy sauce koji mold
toxicity among mutants, 1980
α-Amylase
production by a *Clostridium* sp., 1668
β-Amylase
hyperproductive *B. cereus* mutant
isolation and characterization, 768
*Anabaena* sp. strain 7120
siderophore activity induction
copper toxicity moderation, 917
*Anabaenopsis circularis*
flocculants
characterization, 2226
Anaerobic microorganisms
*A. cellulolyticus*
microcrystalline cellulose hydrolysis, 304
*B. succinogenes*
cellodextrinase isolation, 1034
biofilms
dynamics and kinetics, 27
*C. acetobutylicum*
altered electron flow, 1232
solvent production, 2761
*C. acetobutylicum* ATCC 824
isolation and some properties of a β-D-xylosidase, 651
purification and characterization of two endoxylanases, 644
*C. cylindrosporum*
sporulation in low-Mn medium, 1696
cellulolytic extreme thermophiles
isolation from New Zealand thermal sites, 832
chlorinated compounds
transformation, 2511
*Clostridium* isolate
thermostable amylolytic enzymes, 1661
*Clostridium* spp.
growth inhibition, 1020
*D. carbinolicus* sp. nov.
properties, 802
*E. lentum*
reductive inactivation of digitoxin, 901
iron reduction
magnetite formation, 2610
*M. mazei* S-6
morphology, 1699
*M. voltae*
analog-resistant mutants, 1822
methanogenic cocultures
propionate catabolism, 2260
*O. formigenes*
rat intestine colonization, 2767
obligate anaerobe
isolation from pig feces, 189
*P. niger*
steroid sulfatase activity, 1655
*P. occultum*
sulfur reduction, 1690
perchloroethene dechlorination, 2671
pH
adaptations to low pH, 57
whey biomethanation
microbial ecophysiology, 1147
Ancymidol
T-2 toxin biosynthesis
blockage, 1860
Anilines
properties and bacterial transformation relationships, 911
Animal feed
alfalfa
green juice coagulation, 2206
antimicrobial feed additives
sensitivity of ruminal bacteria, 1620
ionophore antimicrobial activities
potassium ion concentrations, 2363
lactobacilli
host function effectors, 325
potato processing wastes
microbial biomass protein, 284
wheat straw
delignification, 1304
Animal infectivity
*G. muris* cyst viability
correlation with fluorescein diacetate and propidium iodide staining, 704
determination, 704
Animal viruses
inactivation, 2077
inactivation by ozone, 2218
Antibacterial agents
alkaline glutaraldehyde solution
mycobactericidal activity, 737
antimicrobial feed additives
sensitivity of ruminal bacteria, 1620
*N*-halamines
activities, 2082
lysozyme
activity, 2165
marine bacteria
distribution, 2957
ozone
sporicidal activity, 683
pentachlorophenol
effects on bacteria, 2689
sorbic acid
*Clostridium* spp., 1020
Antibiotics
bacteriocin
production by *P. acidilactici*, 2534
fecal indicator bacteria
comparative survival, 1241
halogen-substituted phenols
bacterial O-methylation, 839
β-lactam
*S. clavuligerus* plasmid transformation, 1376
marine air-water interface bacteria
resistance, 2338
nisin
conjugal transfer of plasmid genes, 352
poultry feeds
subtherapeutic levels, 331
Antibodies
farmland sewage sludge application
antibody status of farm families, 1118
*Fusarium* spp. mycotoxins
production and characterization, 17
Antifungal agents
ajoene derived from garlic, 615
ergosterol biosynthesis inhibitors
*P. caseicolum* resistance, 1500
nikkomycin
*S. tendae*, 1
phomenoic acid
*P. lingam* (Tode) Desm., 966
phomenolactone
*P. lingam* (Tode) Desm., 966
rhizobacteria, 1866
sodium bicarbonate
*A. parasiticus*, 2303
*T. glabrata*
susceptibility determined by comparison of growth at several pHs, 593
Antimicrobial agents
esters of fatty acids
*B. subtilis* cell lysis, 505

ionophores
potassium ion concentrations, 2363
phenolics
effect on rumenlike fermentation, 1046
phosphine
aflatoxin production, 2328
surfactants
heterogeneous aerobic culture, 2567
tertiary amine covalently bonded to polystyrene fiber, 2050
Antisera
*Chloroflexus*-specific antisera
evaluation of filamentous bacteria, 1962
Antiviral agents
formaldehyde-based reagents
inactivation of human T-lymphotropic virus type III/lymphadenopathy-associated virus, 708
ozone, 2218
rotaviruses
physicochemical stability and inactivation, 727
sewage sludge
characterization of virucidal agents, 621
virus inactivation, 2077
*Aquaspirillum magnetotacticum*
freeze-thawing
periplasmic protein release, 2590
Aquatic environments
alder swamp
denitrification, 2554
methanogenesis, 2554
sulfate reduction, 2554
*B. thuringiensis* subsp. *israelensis*
simulated field conditions, 828
bacterioplankton biovolume
annual cycle, 2739
benthic cyanobacterial mat
adaptation to spectral light distribution, 879
photosynthetic action spectra, 879
*C. minus*
cell-size change, 864
chlorinated compounds
transformation, 2511
contaminated aquifer
unattached bacteria, 2991
fecal indicator bacteria
comparative survival, 1241
enumeration, 2922
ferric iron
rapid assay, 1536
groundwater aquifers
introduced genotypes, 996
$Hg^{2+}$ stress
microbial adaptation, 2725
Howe Sound (Canadian fjord)
bacterioplankton biomass, 1277
Lake Biwa, Japan
bacterioplankton production rate, 2872
*Legionellaceae*
abundance and distribution, 2231
mercury methylation and demethylation
seasonal and spatial variations, 2397
mineralization of organic chemicals
acclimation period, 791
monosubstituted phenol biodegradation
effect of adaptation to phenol, 1496
naphthalene biodegradation
metabolites, 129
rates, 129
nitrifying bacteria in wastewater reservoirs, 754
pathogenic bacteria
survival in freshwater sediments, 633
planktonic bacteria
heterotrophic activity variation, 2308
population density variation, 2308
plasmids
transduction potential, 987
selenite-resistant bacteria
incidence, 185
streams
bacterial communities, 337
*V. cholerae* O1
enumeration, 2862
wetlands
viruses, 731
Aqueous polymer two-phase systems
organic dust
separation from microorganism suspensions, 860
Aquifers
cresol isomers
biodegradation, 710
denitrification of soil
influence of groundwater nitrate, 1292
introduced genotypes
maintenance and stability, 996
unattached bacteria
growth determinations, 2991
Xenobiotic compounds
adaptation by microbial communities, 2212
degradation, 2212
L-Arabinose
*E. chrysanthemi*
fermentation to ethanol, 2033
*Arachis hypogaea*
drought-stressed kernels
*A. flavus* challenge, 270
Archaebacteria
*P. occultum*
sulfur reduction, 1690
Arginine
arginine deiminase system
bacterial adaptation, 198
*L. sake*
catabolism, 2683
Arginine deiminase system
acid environments
bacterial adaptation, 198
Aroclors
*A. eutrophus* H850
degradation, 1094
Aromatic compounds
biodegradation
dissolution rate, 292
solubility, 292
Aromatic hydrocarbons
benzene
transformation, 254
toluene
transformation, 254
Arsenic
bacterial resistance
well water testing, 2929
*Arthrobacter* sp.
glyphosate uptake, 974
*Arthrobacter* spp.
*s*-ethyl-*N*,*N*-dipropylthiocarbamate
plasmid-associated degradation, 1088
Arylglycerol-β-aryl ether
*P. acidovorans* $D_3$
metabolism, 2605
Aspartase
*E. coli* K-12
increased production, 2800
*P. freudenreichii* subsp. *shermanii*
properties, 1885
Aspartate
metabolism
citrate cycle intermediates, 2600
*Aspergillus flavus*
aflatoxin contamination
maize, 1391
drought-stressed peanut kernels
phytoalexin accumulation, 270
susceptibility, 270
irradiated maize and rice
aflatoxin production, 1142
*Aspergillus fumigatus*
tremorgenic mycotoxins
health problem, 787
*Aspergillus niger*
ajoene derived from garlic
antifungal activity, 615
*Aspergillus parasiticus*
aflatoxin
regulation of biosynthesis, 1224
aflatoxin $B_2$
new-metabolite conversion, 2804
aflatoxin biosynthesis
enzyme activities, 1711
aflatoxin distribution
alteration by sodium bicarbonate, 2303
averufanin
aflatoxin $B_1$ precursor, 14
*O*-methylsterigmatocystin
aflatoxin precursor, 1028
preharvest aflatoxin contamination of developing cottonseed and corn kernels
effect of moisture and substrate variation, 584
viability in Czapek's agar
reduction by sodium bicarbonate, 2303
*Aspergillus* spp.
aflatoxin production
phosphine, 2328
*Aspergillus versicolor*
alkyl amines
metabolism, 246
ATP
hypersaline environments
preservation, 2749
ATPase
*A. viscosus*
acid tolerance, 2124
*L. casei*
acid tolerance, 2124
Attachment
*A. tumefaciens*
auxin, 2574
plasmid pSa, 2574
*B. japonicum*
transposon mutants, 1959
bacteria in coastal waters
heterotrophic activity variation, 2308
population density variation, 2308
*E. cloacae*
protection from chlorination, 1178
physical disruption
influence on bacterial growth, 2996
Aureo SP250
ureolytic bacteria
effect, 2009

Autoconditioning
*S. cerevisiae*
growth inhibition, 33
*Autographa californica*
nuclear polyhedrosis virus
survival, 2771
Auxins
indole-3-acetic acid
*B. japonicum*, 1051
*P. tinctorius*, 2908
production by pseudomonads, 1839
production by xanthomonads, 1839
Averufanin
aflatoxin $B_1$ precursor, 14
*Azospirillum brasilense*
identification and enumeration
assay, 358
substrates, 2745
transposon mutagenesis
insertion mutant analysis, 410
*Azospirillum lipoferum*
transposon mutagenesis
insertion mutant analysis, 410
*Azospirillum* spp.
Kallar grass roots
oxygen tolerance, 163
*Azotobacter chroococcum*
hydroxamate
iron-dependent production, 1418
*Azotobacter vinelandii*
soil nutrients
growth, 489

*Babesia microti*
prevalence in mice on islands inhabited
by white-tailed deer, 892
Babesiosis
*B. microti*
prevalence in mice on islands inhabited by white-tailed deer, 892
*Bacillus amyloliquefaciens*
*A. flavus* aflatoxin production
stimulation, 1142
*Bacillus cereus*
exo-β-amylase-hyperproductive mutant
isolation and characterization, 768
membrane sulfhydryl groups
modification, 79
nitrite, 79
T spore germination
spore coat, 47
*Bacillus sphaericus*
toxin activation, 1333
*Bacillus* spp.
characterization
Minitek system evaluation, 2680
endoglucanase gene
expression in *E. coli*, 2656
isolation from soil, 1263
surface-active agents, 224
*Bacillus stearothermophilus*
spores
thermal inactivation and injury, 365
*Bacillus subtilis*
esters of fatty acids
lysis, 505
pAMβ1
major specific deletion, 2458
protease-deficient strains
staphylococcal protein A, 379
*T. fusca* cellulase gene
expression, 1470
*Bacillus subtilis* subsp. *niger*
microwave sterilization, 2133
*Bacillus thuringiensis*
chromosomal genes and plasmids
transfer, 1525
delta-endotoxin
specificity, 500
delta-endotoxin genes
relatedness, 2808
parasporal protein
toxic trypsin digest fragment, 416
*Bacillus thuringiensis* subsp. *israelensis*
cytolytic protein
purification, 1316
glycoprotein toxin
lectinlike mosquito receptor, 2650
mosquitocidal protein
purification, 1316
simulated field conditions, 828
toxins
similarity to those of *B. thuringiensis*
subsp. *morrisoni*, 1251
*Bacillus thuringiensis* subsp. *morrisoni*
toxins
similarity to those of *B. thuringiensis*
subsp. *israelensis*, 1251
Bacterial inoculants
production on vermiculite, 2138
Bacterial predators
N-1
relation to copper, 1515
Bacteriocin
*P. acidilactici*
production, 2534
production and immunity in *L. acidophilus* 88
conjugal transfer of plasmid-encoded
determinants, 553
*S. lactis* subsp. *diacetylactis* $WM_4$
plasmid analysis, 1171
Bacteriophages
0448 temperate bacteriophage
host strain interactions, 1850
*B. fragilis*
sewage-polluted waters, 1632
bacterial strain(s) in soil
technique for estimating low numbers,
887
freshwater environment
transduction potential, 987
*L. casei* protoplast induction, 2686
lactic streptococcal bacteriophages
characterization and comparison, 1439
*Micromonospora* spp.
transfection, 2544
Mu d1
subcloning, 1649
Mu d2
subcloning, 1649
PL-1
*L. casei* protoplast induction, 2686
*Pseudomonas* spp.
sugarbeet root colonization, 1164
$r_1t$ prophage
induction in *S. cremoris* R1, 385
$r_1t$ temperate bacteriophage
lytic infection inhibition, 385
*R. leguminosarum* biovar *trifolii*
environmental factors, 1125
*S. cremoris*
abortive infection, 923
restriction and modification activity,
923
*S. cremoris* Wg2
specific promoters, 2452
*S. galilaeus*, 2708
Bacterioplankton
biomasses and productivities
Canadian fjord, 1277
biovolume and biomass
relationships, 1298
*C. minus*
cell-size change, 864
cell volume
annual cycle, 2739
DNA
dynamics in marine environments, 170
[$^3$H]thymidine incorporation, 1977
grazing mortality
eucaryote inhibitors, 119
Lake Biwa, Japan
production rate, 2872
production assessment
eucaryote inhibitors, 119
seasonal variations, 2282
seawater biomass
particle counter determination, 274
Bacterivory
activated sludge
cadmium stress, 2440
protozoa
dilution method tests, 2914
monodispersed, fluorescence-labeled
bacteria, 958
studies
inadequacy of cycloheximide, 1969
*Bacteroides fragilis*
bacteriophages, 1632
*Bacteroides ruminicola*
β-glucosidase
regulation, 2505
*Bacteroides succinogenes*
cellodextrinase
isolation, 1034
endoglucanase
characteristics, 41
growth and proton motive force
extracellular pH, 2379
xylanase gene
cloning and expression, 477
Baculoviruses
interaction with nontarget organisms,
1412
polyhedra
measurement of surface charge, 598
Beans
P uptake
influence of fungi, 2699
*Beauveria bassiana*
protease
purification and properties, 1679
Benzene
mixed methanogenic cultures
transformation, 254
Benzenesulfonates
microbial desulfonation, 1459
Betaine
transport
effect on *L. acidophilus* osmotolerance, 2275
Biocorrosion
*D. vulgaris*
hydrogenase activity, 1708
Biodegradation
chlorinated compounds
transformation, 2511
diisopropyl fluorophosphate, 1685

lignin
initial steps, 2642
mangrove leaves
marine zoosporic fungus, 2464
monosubstituted phenols, 1496
*p*-nitrophenol, 2617
perchloroethene dechlorination, 2671
second-order rate coefficients
estimation, 1064
white rot fungi
cytochemical studies, 2384
Bioemulsifiers
*Bacillus* spp.
production, 224
Biofilms
distribution systems
examination and characterization, 2714
physical disruption
influence on bacterial growth, 2996
sulfate reduction
dynamics and kinetics, 27
Biological plugging
oil field core flood experiments
slime-producing bacteria, 278
Biomass
bacterioplankton
Canadian fjord, 1277
relationships to biovolume, 1298
*C. eichhorniae*, 152
potato processing wastes, 284
hypersaline environments
ATP preservation, 2749
marine sediment
production, 2368
ruminal fungi
assessment with chitinase, 1955
seawater bacterial biomass
particle counter determination, 274
Biomethanation
whey
microbial ecophysiology, 1147
Biosurfactants
*Bacillus* spp.
production, 224
Biovolume
bacterioplankton
annual cycle, 2739
relationships to biomass, 1298
*Borrelia burgdorferi*
prevalence in mice on islands inhabited by white-tailed deer, 892
*Bradyrhizobium japonicum*
attachment to host roots
transposon mutants, 1959
cosmid-borne hydrogenase genes
symbiotic expression, 422
DNA region mapping, 2247
hydrogenase
influence on growth of *Glycine* and *Vigna* spp., 610
interactions with the environment
nodulation and competition, 1113
5-methyltryptophan resistance
indole-3-acetic acid content, 1051
nodule recovery and location
alteration, 1737
readily available substrates
response, 1872
serogroup 123
competition for nodulation, 2631
genetic diversity, 2624
soil populations
metal-rich sewage sludge, 315
soybean nodulation
competition, 2631
genotype specificity, 2624
*Brevibacterium flavum*
labeled glutamic acid
biosynthesis, 92
*Brevibacterium linens*
L-methionine transport
stimulation by $Na^+$, 2159
Brewing
extracellular proteinases
applicability, 495
Butanol
*C. acetobutylicum*
challenge and effect, 2854
Butyraldehyde
*C. acetobutylicum*
production by mutants, 2761
Butyrate
degradation in triculture
metabolism kinetics, 434
thermophilic anaerobic degradation
syntrophy, 429
*Butyrivibrio fibrisolvens*
specific growth rate and toxin degradation in vitro
effects of several mycotoxins, 613
xylan fermentation, 2849

Cabbage
*L. monocytogenes*
detection and enumeration, 955
Cadmium
sewage sludge
bacterivory effects, 2440
*Cajanus cajan*
inoculation with competitive rhizobia
increased rhizobium effectiveness, 2066
Calcium
*M. mazei* S-6
effect on morphology, 1699
Calcium alginate gel beads
immobilization of streptococci
plasmid DNA transfer, 898
Calorimetry
cellulase activity, 2935
Calves
immunization
aerosol challenge, 1721
*Campylobacter jejuni*
UV radiation
susceptibility, 375
*Campylobacter* spp.
pigeon feces
isolation, 1394
reservoirs, 1574
surface waters
correlation with indicator bacteria, 523
seasonal occurrence, 523
*Candida albicans*
ajoene derived from garlic
antifungal activity, 615
tropical marine and fresh waters
survival, 1762
*Candida boidinii*
isolation and characterization, 1812
*Candida pintolopesii*
mitochondrial DNA, 345
Canned foods
*B. stearothermophilus* ATCC 12980
spore inactivation and injury, 365
Capsules
*A. calcoaceticus* BD4
drag reduction, 2269
Carbohydrates
*A. brasilense*
substrates, 2745
Carbon
anaerobic rumen fungus
growth and fermentation on various carbon sources, 1210
dissolved organic carbon
bacterial growth, 482
marine sediments, 1794
*E. coli*
growth on [$^{13}$C]acetate, 2445
Lake Biwa, Japan
bacterioplankton production rate, 2872
stable isotopes
fractionation by *M. barkeri*, 2597
stable-carbon-isotope fractionation
sulfur-oxidizing bacteria, 1940
Carbon dioxide
*R. rhodochrous*
propane catabolism, 65
recirculation
growth of methanogens, 946
Carbon monoxide
*A. woodii*
one-carbon-compound utilization, 471
*C. thermoautotrophicum*
chemolithotrophic growth, 1902
Casein
dietary supplement
protein degradation by ruminal microorganisms, 751
Catalase
*S. aureus* MF-31
synthesis, 1207
Cecal microorganisms
*R. tarandus platyrhynchus*
seasonal changes, 114
Svalbard reindeer
seasonal changes, 114
Cell fractionation
*A. magnetotacticum*
freeze-thawing, 2590
Cell immobilization
*E. coli* JM105(pKK223-200)
plasmid stability, 1548
Cell volume
bacterioplankton
annual cycle, 2739
*C. minus*
changes related to physiological state, 864
yeasts
glycerol accumulation, 2119
Cell wall
*A. brasilense*
substrates, 2745
*C. reinhardtii*
degradation by proteases, 1701
Cell wall hydrophobicity
role in bacterial adhesion, 1893, 1898
Cellobiose
utilization by *T. curvata*, 1743
Cellodextrinase
*B. succinogenes*
isolation, 1034
Cellular energy status
aflatoxin biosynthesis
regulation, 1224
Cellulase

*A. cellulolyticus*
microcrystalline cellulose hydrolysis, 304
anaerobic rumen fungus
growth on various substrates, 1216
endoglucanase gene
expression in *E. coli*, 2656
*S. thermophile*
activity, 2175
Cellulolytic bacteria
*A. cellulolyticus*
microcrystalline cellulose hydrolysis, 304
anaerobic extreme thermophiles
isolation from New Zealand thermal sites, 832
*B. succinogenes*
cellodextrinase isolation, 1034
pH and growth, 2379
xylanase gene, 477
*C. thermocellum*
enzyme complex, 2785
pigs
dietary fiber, 22
*R. tarandus platyrhynchus*
seasonal changes, 114
Svalbard reindeer
seasonal changes, 114
*T. curvata*
cellobiose utilization, 1743
Cellulolytic fungi
*S. thermophile*, 2175
Cellulose
cellulase activity
analysis, 2935
microcrystalline cellulose
hydrolysis by *A. cellulolyticus*, 304
*S. thermophile*
degradation, 2175
*Cephalosporium eichhorniae*
potato processing wastes
microbial biomass protein, 284
Cereals
*A. brasilense* Cd.
identification and enumeration in roots, 358
Channel catfish
*E. ictaluri* identification
rapid plasmid analysis, 1267
Cheese
*P. camemberti* and related contaminants
antigenic characterization, 872
*S. cremoris*
metalloendopeptidase, 2296
plasmid-determined abortive infection, 923
plasmid-determined restriction activity, 923
Chemotaxis
*C. acetobutylicum*
role in solvent production, 1924
Chicken skins
*C. botulinum* types A and B
effects of irradiation, 201
Chickens
poultry feed antibiotics
subtherapeutic levels, 331
Chitin
effects on *V. cholerae* O1 survival at low temperature, 603
Chitinase
rapid test, 1718
ruminal fungi
assessment, 1955
*Chlamydomonas reinhardtii*
cell wall framework
degradation by proteases, 1701
Chloramines
*L. pneumophila*
inactivation, 2983
*Chlorella* spp.
extracellular polysaccharides
chelating properties, 2953
Chlorinated phenols
degradation
pentachlorophenol-degrading bacterium, 907
pentachlorophenol
effects on bacteria, 2689
Chlorine
*E. cloacae*
protection, 1178
*G. muris*
inactivation of cysts, 1448
*L. pneumophila*
killing in a plumbing system, 447
*Y. enterocolitica*
reduced invasiveness, 1358
survival and virulence, 1768
Chlorobenzenes
1,4-dichlorobenzene
degradation by a *Pseudomonas* sp., 1010
utilization
recombinant construction, 2470
3-Chlorobenzoate
*P. alcaligenes*
metabolism, 1846
Chlorocatechols
transformation, 2511
*Chloroflexus aurantiacus*
hot spring cyanobacterial mats
fermentation products, 2343
*Chloroflexus* spp.
specific antiserum
evaluation of filamentous bacteria, 1962
Chloroguaiacols
transformation, 2511
1-Chlorohexadecane
*M. convolutum* phospholipids
chlorinated fatty acid distribution, 10
*p*-Chlorophenol
fate in test systems
parameters, 1833
Chloroveratroles
transformation, 2511
Cholyltaurine hydrolase
antibiotics in poultry feeds
effects, 331
*Chromatium minus*
cell-size change
relation to physiological state, 864
1,4-Cineole
microbial hydroxylation, 2482
Cinnabar
*T. ferrooxidans*
mobilization by a mercury-resistant strain, 772
pyrite oxidation, 772
Citrate
*P. halophilus*
metabolism, 1257
Citrate cycle
aspartate and lactate metabolism
intermediates, 2600
*Clavibacter michiganense* subsp. *sepedonicum*
pCS1 plasmid sequences
homology with DNA, 2476
*Claviceps* spp.
parasexual processes
induction, 70
Clinoptilolite
ureolytic bacteria
effect, 2009
Cloning
*B. succinogenes*
endoglucanase, 41
xylanase gene, 477
cloned monkey metallothionein
expression in *E. coli*, 204
*E. coli*
xylanase gene, 477
endoglucanase gene
expression in *E. coli*, 2656
ochratoxin A
detection, 514
*P. putida*
broad-host-range vectors, 1649
gene fusions, 1649
*P. tannophilus*
xylulokinase gene, 2975
*S. cremoris* Wg2
specific promoters, 2452
*S. lactis* subsp. *diacetylactis* $WM_4$
bacteriocin production, 1171
*S. lactis* subsp. *lactis*
chromosomal fragment, 1584
*T. fusca* cellulase gene
expression in other organisms, 1470
*Z. mobilis*
expression vector, 235
Clostridia
sodium nitrite
ferredoxin inactivation, 549
pyruvate-ferredoxin oxidoreductase inactivation, 549
*Clostridium acetobutylicum*
altered electron flow
induction by viologen dyes, 1232
butyraldehyde production, 2761
lipid composition
butanol challenge, 2854
temperature effect, 2854
membrane fluidity
butanol challenge, 2854
temperature effect, 2854
membrane H conductance
electrogenic Na/H antiport, 782
1,3-propanediol
production from glycerol, 639
purification and characterization of two endoxylanases, 644
solvent production
altered quantities, 2761
prediction, 2496
role of chemotaxis, 1924
β-D-xylosidase
isolation and some properties, 651
*Clostridium beijerinckii*
alcohol dehydrogenases
butanol-ethanol-dehydrogenase, 697
butanol-ethanol-isopropanol dehydrogenase, 697
*Clostridium botulinum*
growth
effects of irradiation, 201
growth inhibition

fumarates and maleates, 110
physicochemical constants, 110
toxigenicity
effects of irradiation, 201
type A and type B (proteolytic)
sorbic acid inhibition, 935
type E toxin purification, 2827
type G
isolation from Swiss soil, 1880
*Clostridium butylicum*
alcohol dehydrogenases
butanol-ethanol-dehydrogenase, 697
butanol-ethanol-isopropanol dehydrogenase, 697
*Clostridium cylindrosporum*
sporulation, 1696
*Clostridium formicoaceticum*
homoacetic fermentation of lactate
kinetics, 823
*Clostridium* spp.
α-amylase production, 1668
α-glucosidase production, 1668
growth inhibition
sorbic acid, 1020
stringent-type response, 1020
1,3-propanediol
production from glycerol, 639
pullulanase production, 1668
thermostable amylolytic enzymes, 1661
*Clostridium thermoaceticum*
membrane H conductance
electrogenic Na/H antiport, 782
*Clostridium thermoautotrophicum*
chemolithotrophic growth
carbon monoxide dependence, 1902
*Clostridium thermocellum*
cellulolytic enzyme complex
macromolecular organization, 2785
Coal
leonardite solubilization, 2840, 2844
microbially mediated leaching
experimental coal columns, 1056
Coconut agar medium
aflatoxin screening, 1593
Coliform bacteria
distribution system biofilms, 2714
*E. cloacae*
protection from chlorination, 1178
*E. coli*
metabolic modifications, 1476
recovery from ozonated water, 2894
hydrophobic-grid membrane filter procedure
comparison with standard methods, 1003
recovery from treated water
comparison of media, 1571
tropical waters
enumeration, 2922
*Colletotrichum gloeosporioides*
microcycle conidiation, 2106
microplate assay for spore production, 627
spore-carrying capacity, 2106
Colony morphology
*C. acetobutylicum*
solvent production, 2496
*Columba livia*
*Campylobacter* spp.
isolation from feces, 1394
Competition
*B. japonicum*
interstrain competition and nodulation, 1113
*P. syringae*
epiphytic bacteria, 2520
staphylococcal enterotoxin A
production in mixed cultures, 2271
Concrete
corrosion by thiobacilli, 1645
Conjugative mobilization
lactic streptococci, 2405
Consumer use testing
cosmetic products
correlation with microbial challenge testing, 1827
Cooling towers
*L. pneumophila*
control, 1775
Copper
*Anabaena* sp. strain 7120
copper toxicity moderation, 917
*M. scrofulaceum*
resistance and precipitation, 1951
*P. syringae* pv. *tomato*
copper resistance plasmid, 454
relation to N-1, 1515
*Y. enterocolitica*
survival and virulence, 1768
Copper sulfate
ureolytic bacteria
effect, 2009
*Coriolus versicolor*
leonardite coal solubilization, 2840, 2844
Corn
aflatoxin contamination
Bhagalpur, India, 1391
*P. fluorescens*
attachment to roots, 1397
preharvest aflatoxin contamination of developing kernels
effect of moisture and substrate variation, 584
Corrosion
concrete
thiobacilli, 1645
*Corynebacterium sepedonicum*
pCS1 plasmid sequences
homology with DNA, 2476
Cosmetic products
microbial challenge testing
correlation with consumer use testing, 1827
Cotton
preharvest aflatoxin contamination of developing cottonseed
effect of moisture and substrate variation, 584
Cowpea
nitrous oxide
reduction in nodules, 1168
*Crassostrea gigas*
recovery of *V. cholerae*
elevated temperature method, 1181
*p*-Cresol
production by an obligate anaerobe
pig feces, 189
Cresols
anoxic aquifers
biodegradation, 710
Cricket paralysis virus
olive fruit fly
control agent, 142
Crown gall
*A. tumefaciens*
characterization of isolates, 1338
population heterogeneity in *Populus* L. galls, 655
opine-utilizing bacteria
coryneform isolates, 1519
*Cryptosporidium* sp.
detection in water
polypropylene cartridge filters, 687
river water
identification of oocysts, 672
*Cunninghamella elegans*
7,12-dimethylbenz[*a*]anthracene
stereoselective metabolism, 2560
Cyanobacteria
*A. circularis* PCC 6720
flocculant characterization, 2226
*Anabaena* sp. strain 7120
copper toxicity moderation, 917
benthic cyanobacterial mat
adaptation to spectral light distribution, 879
photosynthetic action spectra, 879
fermentation products
formation and fate, 2343
hot spring microbial mat
*Chloroflexus*-specific antiserum, 1962
marine microbial mats
diel interactions, 2353
*N. commune*
phospholipid fatty acids and carotenoids, 4
nitrogen fixation
sodium influx and salt tolerance, 1934
*O. terebriformis*
diel vertical movements, 2142
survival in darkness, 2151
*Phormidium* sp. strain J-1
flocculant characterization, 2226
Cyclic AMP
transport by marine bacteria, 2963
Cycloheximide
protozoan grazing
inadequacy in studies, 1969
Cytopathic effects
hepatitis A virus
FRhK-4 cell pathology, 2967

*Dacus oleae* Gmel.
cricket paralysis virus
control agent, 142
Darkness
*O. terebriformis*
survival, 2151
DDT
*P. chrysosporium*
biodegradation, 2001
Deepoxy trichothecenes
preparation and characterization, 2821
Deep-sea bacteria
glucose transport system
properties, 527
Dehalogenation
*A. denitrificans* NTB-1
hydrolytic dehalogenation of haloaromatic compounds, 810
Dehydrodivanillin
degradation, 542
Delignification
wheat straw
*Pleurotus* spp., 1304
Delta-endotoxin
*B. thuringiensis*
gene relatedness, 2808
specificity, 500

Denitrification
alder swamp
dynamics, 2554
aquifer soil
influence of groundwater nitrate, 1292
nearshore marine sediments
influence of groundwater nitrate, 1292
nitrous oxide
reduction in nodules, 1168
*P. aeruginosa*
oxygen regulation of nitrate uptake, 745
*Desulfovibrio carbinolicus* sp. nov.
properties, 802
*Desulfovibrio vulgaris*
hydrogenase activity
anaerobic biocorrosion, 1708
Desulfurization
*T. ferrooxidans*
enumeration in a population of acidophilic bacteria, 660
Detoxification
diisopropyl fluorophosphate, 1685
metolachlor
metabolism by microorganisms, 390
4,15-Diacetoxyscirpenol
*F. sambucinum* NRRL 13495
preparation, 460
Diazotrophic rods
Kallar grass roots
oxygen tolerance, 163
Diazotrophs
root interior of Kallar grass
cross-reaction of nitrogen-fixing bacteria with enveloped, round bodies, 889
1,4-Dichlorobenzene
*Pseudomonas* sp.
degradation, 1010
2,4-Dichlorobenzoate
*A. denitrificans* NTB-1
reductive dechlorination, 810
Dietary fiber
pigs
xylanolytic and cellulolytic bacteria, 22
Digitoxin
*E. lentum*
reductive inactivation, 901
Diisopropyl fluorophosphate
bacterial detoxification, 1685
Dilution method
bacterivory estimation
critical assumptions, 2914
Dimethyl disulfide-forming bacteria
identification, 1541
Dimethyl sulfide
phototrophic purple bacteria
oxidation to dimethyl sulfoxide, 2026
Dimethyl sulfoxide
phototrophic purple bacteria
dimethyl disulfide oxidation, 2026
7,12-Dimethylbenz[*a*]anthracene
stereoselective fungal metabolism, 2560
Dimethylsulfoniopropionate
methylated sulfur compounds
anoxic salt marsh sediments, 2426
Dinitrogen fixation
petroleum refinery oily sludge
free-living bacteria, 1674
Direct viable count
arsenic-resistant bacteria
well water testing, 2929
enumerated cells
metabolic activity, 2889
marine bacteria
correlation with heterotrophic activity, 2332
Disaccharides
*S. bovis*
transport and phosphorylation, 2388
Disinfection
*L. pneumophila*
hypochlorite, 2983
killing in a plumbing system, 447
organic chloramine, 2983
*N*-halamines
bactericidal activities, 2082
ozonated wastewater
*E. coli* recovery, 2894
tuberculocidal activity
measurement, 2189
Dissolution rate
aromatic compounds
degradation, 292
Dissolved organic substrates
microbial incorporation
marine sediments, 1749
Distribution systems
biofilm characterization, 2714
DNA
adsorption to sand, 2948
*B. japonicum*
mapping, 2247
bacterioplankton
[$^3$H]thymidine incorporation, 1977
*C. michiganense* subsp. *sepedonicum*
pCS1 homology, 2476
*C. sepedonicum*
pCS1 homology, 2476
conjugative transposon Tn*916*
Tn*5* insertions, 1069
isolation
guanidine isothiocyanate, 2588
*L. monocytogenes*
detection, 2256
marine environments
dynamics, 170
mitochondrial DNA
*C. pintolopesii* 108-1, 345
soybean root nodule bacteria
symbiotic region conservation, 2253
streptococcal plasmid DNA
conjugal transfer, 898
DNA colony hybridization
*L. monocytogenes*
detection, 2256
DNA hybridization
*Lotus* rhizobia
identification, 1705
DNA probes
*V. vulnificus*
identification of marine isolates, 193
DNA restriction fragment length polymorphisms
*A. bitorquis*, 816
*A. brunnescens*, 816
DNase
bacterioplankton DNA
[$^3$H]thymidine incorporation, 1977
Dot-blot hybridization
hepatitis A virus detection, 2487
Drinking water
*C. jejuni*
UV radiation susceptibility, 375
distribution system biofilms, 2714
*E. cloacae*
protection from chlorination, 1178
*G. muris*
inactivation of cysts, 1448
*L. pneumophila*
survival and multiplication, 979
recovery of coliform bacteria, 1571
*Y. enterocolitica*
UV radiation susceptibility, 375
Dry dusting
sanitization
microbiological evaluation, 1042

*Edwardsiella ictaluri*
identification
rapid plasmid analysis, 1267
Egg washwater
bacterial survival and transport, 2060
Electron flow
*C. acetobutylicum*
alteration by viologen dyes, 1232
Electrophoretic mobility
bacterial adhesion, 1898
Emulsans
*A. calcoaceticus* BD4
reconstitution of activity, 440
Endocellulase
*T. fusca*
regulation of synthesis, 1352
Endoglucanase
*B. succinogenes*
characteristics, 41
*Bacillus* sp. gene
expression in *E. coli*, 2656
*P. solanacearum*
purification and characterization, 2237
β-1,4-Endoglucanase
*T. fusca*
regulation of synthesis, 1352
Enteric microorganisms
*E. coli*
sodium deoxycholate action, 1944
ex-germfree rats
active ecosystem, 2866
mucosa-associated microbial populations, 1965
oxalate degradation, 1793
*P. niger*
steroid sulfatase activity, 1655
ureolytic bacteria
effect of Aureo SP250, 2009
effect of clinoptilolite, 2009
effect of dietary copper sulfate, 2009
*Enterobacter cloacae*
protection from chlorination
attachment as a factor, 1178
*Enterococcus faecalis*
hemolysin-bacteriocin plasmids
same incompatibility group, 567
plasmid pAMβ1
transfer from lactobacilli, 2693
*Enterococcus faecium*
intergeneric protoplast fusion
dehydrodivanillin degradation, 542
Entomopathogenic fungi
*B. bassiana*
protease, 1679
Enumeration
arsenic-resistant bacteria
well water testing, 2929
direct viable count
cell metabolic activity, 2889
fecal coliform bacteria

tropical waters, 2922
*Klebsiella* spp., 1716
marine bacteria
direct viable count, 2332
microorganisms
most-probable-number statistics, 1327
sporogenous bacterial populations
anaerobic sewage digestion, 2414
*V. cholerae* O1
Bangladesh waters, 2862
Enzyme-linked immunosorbent assay
*A. brasilense* Cd.
identification and enumeration, 358
vesicular-arbuscular mycorrhizal fungi
identification, 2222
Enzymes
*A. eutrophus* H850
polychlorinated biphenyl metabolism, 1103
*A. parasiticus*
aflatoxin biosynthesis, 1711
*A. viscosus*
ATPase, 2124
acetylxylan esterase
*R. mucilaginosa*, 2831
*Acinetobacter* sp. strain GJ70
degradation of halogenated alkanes, 561
alanine dehydrogenase
properties, 1885
alcohol dehydrogenases
butanol-ethanol-dehydrogenase, 697
butanol-ethanol-isopropanol dehydrogenase, 697
alcohol oxidase
*C. boidinii*, 1812
aminopeptidase A from *S. cremoris*
purification and some properties, 577
α-amylase
production by a *Clostridium* sp., 1668
β-amylase
hyperproductive *B. cereus* mutant, 768
aspartase
*E. coli* K-12 production, 2800
properties, 1885
ATPase
*A. viscosus*, 2124
*L. casei*, 2124
*B. ruminicola*
β-glucosidase regulation, 2505
*C. acetobutylicum* ATCC 824
purification and characterization of two endoxylanases, 644
*C. beijerinckii*
alcohol dehydrogenases, 697
*C. butylicum*
alcohol dehydrogenases, 697
*C. thermocellum*
cellulose hydrolysis, 2785
*C. versicolor*
leonardite coal solubilization, 2844
catalase
synthesis in *S. aureus* MF-31, 1207
cellodextrinase
isolation from *B. succinogenes*, 1034
cellulase
anaerobic rumen fungus, 1216
analysis of activity, 2935
microcrystalline cellulose hydrolysis, 304
*S. thermophile*, 2175
chitinase
assessment of ruminal fungi, 1955
rapid test, 1718
cholyltaurine hydrolase
antibiotics in poultry feeds, 331
dehalogenase
*Acinetobacter* sp. strain GJ70, 561
diisopropyl fluorophosphatases, 1685
DNase
bacterioplankton DNA [$^3$H]thymidine incorporation, 1977
*E. coli*
ethanol production, 2420
*E. coli* K-12
increased production, 2800
endocellulase
regulation in *T. fusca*, 1352
endoglucanase
*B. succinogenes*, 41
expression in *E. coli*, 2656
*P. solanacearum*, 2237
β-1,4-endoglucanase
regulation in *T. fusca*, 1352
ferredoxin
sodium nitrite inactivation, 549
*Frankia* spp.
isozyme variation, 1596
β-galactosidase
*E. coli* detection, 1073
gas metabolism
acetylene effects, 298
glucose-6-phosphate dehydrogenase
relationship of alloenzymes to pigmentation, 1983
α-glucosidase
production by a *Clostridium* sp., 1668
β-glucosidase
regulation, 2505
β-glucosidase from *E. amylovora*
effect of increased enzyme activity on virulence, 677
β-glucuronidase
*E. coli* detection, 1073
glutamate decarboxylase
*E. coli* detection, 1073
hydrogenase
*B. japonicum* symbiotic expression, 422
*D. vulgaris*, 1708
influence on growth of *Glycine* and *Vigna* spp., 610
inulinase
thermophilic bacterial strains, 942
isozyme variation
*Frankia* spp., 1596
*L. casei*
ATPase, 2124
PL-1-induced protoplasts, 2686
*L. sake*
arginine catabolism, 2683
lignin peroxidase
wood degradation, 2384
ligninase
selection and improvement of microorganisms, 242
*Xanthomonas* sp. strain 99, 2242
lignocellulose degradation
*Streptomyces* spp., 2754
lipases
plate assay, 211
malate dehydrogenase
medium for accumulation, 1913
metalloendopeptidase
purification and characterization, 2296
mouse enterocytes
lactobacilli as effectors, 325
$N_2O$ reductase
*P. aeruginosa* growth on $N_2O$, 2045
nuclease
screening, 2593
*P. fluorescens* B52
proteinase, 1973
*P. freudenreichii* subsp. *shermanii*
alanine dehydrogenase, 1885
aspartase, 1885
*P. halophilus*
citrate metabolism, 1257
*P. solanacearum*
endoglucanase, 2237
*P. versicolor*
leonardite coal solubilization, 2840
pectate lyase
purification from *E. carotovora*, 1189
peptidases
consecutive reactions, 1482
phospho-β-galactosidase
*S. aureus* amino acid sequences, 969
protease
*B. bassiana*, 1679
*C. reinhardtii* cell wall degradation, 1701
protease-deficient *B. subtilis*, 379
*S. cremoris* variants, 309
proteinase
*P. fluorescens* B52, 1973
yeasts and brewing, 495
proteolytic enzymes
*S. lactis* protoplast transfection, 2583
*Pseudomonas* sp.
1,4-dichlorobenzene degradation, 1010
pullulanase
production by a *Clostridium* sp., 1668
pyruvate-ferredoxin oxidoreductase
sodium nitrite inactivation, 549
*R. leguminosarum* biovar *viceae*
polymorphism in a pea crop, 397
*R. mucilaginosa*
acetylxylan esterase, 2831
*S. aureofaciens*
malate dehydrogenase, 1913
*S. cerevisiae*
ethanol production, 1286
*S. cremoris*
membrane-bound aminopeptidase A, 577
metalloendopeptidase, 2296
*S. cremoris* Wg2, 853
cell wall-associated proteases, 853
*S. marcescens*
nuclease production, 2593
*S. thermophile*
cellulase, 2175
seasonal and spatial distribution
marine sediments, 1749
steroid sulfatase
*P. niger*, 1655
*Streptomyces* spp.
cellulolytic system, 2835
lignocellulose degradation, 2754
xylanolytic system, 2835
succinate dehydrogenase
symbiotic bacteroid differentiation, 1947
*T. curvata*
cellobiose utilization, 1743
thermostable amylolytic enzymes
*Clostridium* isolate, 1661
thiol methyltransferases

widespread occurrence, 1626
trichloroethylene
biodegradation, 949
trypsin
*B. thuringiensis* subsp. *kurstaki* parasporal protein, 416
*Xanthomonas* sp. strain 99
ligninase, 2242
xylanase
anaerobic rumen fungus, 1216
gene cloning and expression, 477
xylose isomerase
expression in *S. cerevisiae*, 1996
β-D-xylosidase from *C. acetobutylicum* ATCC 824
isolation and some properties, 651
xylulokinase
cloning of gene, 2975
Epiphytic bacteria
competitive exclusion, 2520
flagellar motility, 2528
Epoxides
alkene-utilizing bacteria
hydrocarbon oxidation, 2903
Ergosterol biosynthesis inhibitors
*P. caseicolum*
resistance, 1500
Ergot
*Claviceps* spp.
parasexual processes, 70
*Erwinia amylovora*
increased β-glucosidase activity
effect on virulence, 677
*Erwinia carotovora*
pectate lyase purification
procedure, 1189
*Erwinia chrysanthemi*
L-arabinose
fermentation to ethanol, 2033
D-xylose
fermentation to ethanol, 2033
*Escherichia coli*
aspartase production increase
recombinant plasmid, 2800
*Bacillus* endoglucanase gene
expression, 2656
cloned monkey metallothionein
expression, 204
detection
coagglutination, 1073
enzyme capture tests, 1073
enumeration in sewage
membrane filtration media, 1246
ethanol production
genetic engineering, 2420
genetically engineered organisms
sensitivity to selective media, 606
growth in seawater-wastewater
metabolic modifications, 1476
growth on [$^{13}$C]acetate
proline excretion, 2445
meats and poultry
isolation, 2394
mobilization of plasmid pHSV106, 665
*P. tannophilus* xylulokinase gene
cloning, 2975
plasmid stability, 1548
pTG201 recombinant plasmid
stability influenced by immobilization, 740
recovery from ozonated water, 2894
sodium deoxycholate
action, 1944
starvation in seawater
metabolic modifications, 1476
xylanase gene
expression, 477
xylose isomerase gene
expression in *S. cerevisiae*, 1996
Esters
fatty acids
*B. subtilis* cell lysis, 505
Estuaries
fecal indicator bacteria
comparative survival, 1241
hepatitis A virus
A-ELISA, 1192
*Legionellaceae*
abundance and distribution, 2231
mercury-methylating activity
salinity effect, 261
sulfate-reducing bacteria
selenate reduction to selenide, 1365
*V. cholerae*
incidence, 1344
*V. vulnificus*
DNA probe for identification, 193
identification of marine isolates, 193
virulent strains, 1349
Ethane
production by methanogens, 1604
Ethanol
*E. chrysanthemi*
L-arabinose fermentation, 2033
D-xylose fermentation, 2033
*E. coli*
production, 2420
*K. planticola*
D-xylose fermentation, 2039
*S. cerevisiae*
batch fermentation, 1286
*S. cerevisiae* growth inhibition
autoconditioning factor, 33
*T. reesei*
perturbation of glycosylation, 463
perturbation of hypersecretion, 463
yeast cell membranes
adaptation, 1196
*Z. mobilis*
increased production, 1425
Ethylene
production by methanogens, 1604
*s*-Ethyl-*N*,*N*-dipropylthiocarbamate
*Arthrobacter* spp.
plasmid-associated degradation, 1088
*Eubacterium lentum*
digitoxin
reductive inactivation, 901
*Eubacterium limosum*
one-carbon-compound utilization
characteristics, 471
Eucaryote inhibitors
bacterioplankton
grazing mortality, 119
production assessment, 119
Exotoxin A
*P. aeruginosa*
improvement of yield, 2013

Farm families
farmland sewage sludge application
antibody status, 1118
Fatty acids
acetate in granular sludge
methanogenesis inhibition, 403
esters
*B. subtilis* cell lysis, 505
lactobacillus identification, 2883
*M. convolutum* phospholipids
chlorinated fatty acid distribution, 10
nonadecafluoro-*n*-decanoic acid
effect on *A. laidlawii*, 1236
piggery waste
degradation of malodorous substances, 137
Fecal bacteria
resistance to antimicrobial agents
pig transit and holding times, 1307
Fecal flora
swine
high-fiber and high-oil diets, 1638
Fermentation
anaerobic rumen fungus
effect of temperature, 1210
growth on various carbon sources, 1210
anaerobic sewage digestion
sporogenous bacterial populations, 2414
*B. fibrisolvens*
xylans, 2849
*C. acetobutylicum*
altered electron flow, 1232
1,3-propanediol production, 639
proton conductance, 782
solvent production, 1924
*C. acetobutylicum* ATCC 824
purification and characterization of two endoxylanases, 644
*C. thermoaceticum*
proton conductance, 782
cellulolytic anaerobic extreme thermophiles
isolation from New Zealand thermal sites, 832
*Clostridium* spp.
1,3-propanediol production, 639
*E. chrysanthemi*
ethanol from sugars, 2033
extracellular proteinases
applicability, 495
homoacetic fermentation of lactate
kinetics, 823
hot spring cyanobacterial mats, 2343
*K. planticola*
ethanol from D-xylose, 2039
*L. plantarum*
pyruvate conversion to acetoin, 1798
lactic acid bacteria
differential medium, 1382
*P. acidilactici*
sucrose, 2534
*P. freudenreichii* subsp. *shermanii*
enzymes, 1885
*P. halophilus*
citrate metabolism, 1257
ruminal microorganisms
effect of phenolics, 1046
*S. cerevisiae*
ethanol production, 1286
*S. lactis*
malolactic fermentation mutants, 320
*Streptomyces* spp.
lignocellulose degradation, 2754
vermiculite
bacterial inoculant production, 2138
wine
killer yeasts, 2171
*Z. mobilis*

alcohol production, 1425
expression vector, 235
Ferredoxin
sodium nitrite inactivation, 549
Filamentous bacteria
hot spring microbial mat
*Chloroflexus*-specific antiserum, 1962
Filtration
activated carbon filters
survival of selected bacterial species, 777
coliform analysis
hydrophobic-grid membrane filter procedure, 1003
Fire blight disease
*E. amylovora*
effect of increased β-glucosidase activity on virulence, 677
Firefly bioluminescence ATP method
*S. aureus*
detection, 88
lysostaphin lysis procedure, 88
Fish
*A. salmonicida* from diseased fish
major common extracellular proteins, 722
Fitness
*P. syringae*
flagellar motility, 2528
Flagella
*P. syringae*
epiphytic fitness, 2528
*Flavobacterium* sp.
chlorinated phenol degradation, 907
Flocculants
*A. circularis* PCC 6720
characterization, 2226
*Phormidium* sp. strain J-1
characterization, 2226
Flow cytometric analysis
effects on phytoplankton, 2677
Flow microcalorimetry
heterogeneous aerobic culture
surfactants, 2567
Flowthrough reactor flasks
microbial metabolism
study in sediments, 371
Fluorescein diacetate staining
*G. muris* cyst viability
correlation with animal infectivity, 704
determination, 704
Fluorescence microscopy
cadmium
bacterivory effects, 2440
Fluorescent-antibody direct viable count
*V. cholerae* enumeration, 2862
Fluorogenic dyes
*G. muris* cyst viability
correlation with animal infectivity, 704
determination, 704
Food
acetaldehyde production, 2815
aflatoxin production
phosphine, 2328
alfalfa green juice
microbial coagulation, 2206

comparative yields of T-2 toxin and related trichothecenes, 693
T-2 toxin biosynthesis blockage, 1855, 1860
*G. fasciculatum*
*L. leucocephala* mycorrhizal dependency, 797
*G. fasciculatus*
hyphal elongation, 1928
*G. pulicaris*
T-2 toxin biosynthesis blockage, 1860
grape sour rot
analysis of associated yeast flora, 571
analysis of chemical disease markers, 571
marine zoosporic fungus
mangrove leaf occupation, 2464
ochratoxin A
detection, 514
organic dust
separation from microorganism suspensions, 860
*P. bilaji*
wheat and field bean P uptake, 2699
*P. camemberti* and related contaminants
antigenic characterization, 872
*P. caseicolum*
resistance to ergosterol biosynthesis inhibitors, 1500
*P. chrysosporium*
basidiospore formation, 1464
DDT biodegradation, 2001
lignin degradation, 242
mating system, 1464
*P. cyclopium*
6-methyl-1,2,4-benzenetriol, 1531
*P. lingam* (Tode) Desm.
antifungal substances, 966
*P. tannophilus*
xylulokinase gene cloning, 2975
*P. tinctorius*
indole-3-acetic acid biosynthesis, 2908
*P. verrucosum*
ochratoxin A production, 266
*P. versicolor*
leonardite coal solubilization, 2840
*P. vesicula*
mangrove leaf occupation, 2464
*P. viridicatum*
ochratoxin A production, 266
*Pleurotus* spp.
delignification of wheat straw, 1304
*R. littoreum*
phototaxis, 1819
*R. mucilaginosa*
acetylxylan esterase, 2831
ruminal fungi
assessment with chitinase, 1955
*S. atra*
trichothecene mycotoxins, 1370
*S. racemosum*
7,12-dimethylbenz[*a*]anthracene, 2560
*S. thermophile*
cellulase activity, 2175
cellulose degradation, 2175
growth, 2175
soy sauce koji mold
toxicity, 1980
*T. delbrueckii*
artificial diploids, 1504, 1512
*T. glabrata*
susceptibility in the presence of six antifungal agents, 593
*T. reesei*
ethanol perturbation of glycosylation, 463
ethanol perturbation of hypersecretion, 463
vesicular-arbuscular mycorrhizal fungi
identification, 2222
influence on P uptake, 2699
white rot fungi
cytochemical studies, 2384
Furunculosis
*A. salmonicida* from diseased fish
major common extracellular proteins, 722
*Fusarium culmorum*
moniliformin formation, 196
*Fusarium sambucinum*
4,15-diacetoxyscirpenol
preparation, 460
scirpentriol
preparation, 457
triacetoxyscirpenol
preparation, 457
*Fusarium sporotrichioides*
moniliformin formation, 196
T-2 toxin biosynthesis
blockage, 1855, 1860
toxicologically important strains
comparative yields of T-2 toxin and related trichothecenes, 693
*Fusarium* spp.
mycotoxin antibodies
production and characterization, 17
*Fusobacterium varium*
intergeneric protoplast fusion
dehydrodivanillin degradation, 542

β-Galactosidase
*E. coli*
detection, 1073
Gas chromatography
lactobacillus identification, 2883
Gaseous substrates
growth of methogens
high-pressure equipment, 1876
Gases
acetylene-contaminating gases
gas-utilizing enzymes, 298
stable carbon isotopes
fractionation by *M. barkeri*, 2597
Gene fusions
*P. putida*
in vivo formation, 1649
Gene mapping
*B. japonicum*
reiterated sequences, 2247
symbiosis genes, 2247
Gene transfer
*B. thuringiensis*, 1525
*E. coli*
ethanol production, 2420
lactic streptococci
conjugative mobilization, 2405
*Methanosarcina* spp., 2500
Genetic engineering
baculoviruses
interaction with nontarget organisms, 1412
*E. coli*
ethanol production, 2420
*E. coli* HB101
mobilization of plasmid pHSV106, 665
genetic stability
bacteria of potential use, 105
genetically engineered organisms
sensitivity to selective media, 606
*K. planticola*
ethanol from D-xylose, 2039
lactic streptococci
conjugative mobilization, 2405
nisin plasmid genes
conjugal transfer, 352
pTG201 recombinant plasmid
stability influenced by immobilization, 740
*S. lactis*

transformation, 1730
Genetic stability
genetic engineering
bacteria of potential use, 105
Germination
*B. cereus*
T spores, 47
spores
*B. cereus*, 47
*Giardia muris*
cyst viability determination
animal infectivity, 704
fluorescein diacetate and propidium iodide staining, 704
cysts
inactivation by chlorine, 1448
*Giardia* spp.
presence in muskrats, 1790
reservoirs, 1574
*Gibberella pulicaris*
T-2 toxin biosynthesis
blockage, 1860
*Glomus fasciculatum*
soil solution phosphorus status
*L. leucocephala* mycorrhizal dependency, 797
*Glomus fasciculatus*
hyphal elongation, 1928
Glucose
deep-sea bacteria
transport system, 527
Glucose-6-phosphate dehydrogenase
alloenzymes in *S. marcescens*
relationship to pigmentation, 1983
α-Glucosidase
production by a *Clostridium* sp., 1668
β-Glucosidase
*B. ruminicola*
regulation, 2505
*E. amylovora*
effect of increased enzyme activity on virulence, 677
β-Glucuronidase
*E. coli*
detection, 1073
Glutamate decarboxylase
*E. coli*
detection, 1073
Glutamic acid
*B. flavum*
biosynthesis of labeled glutamic acid, 92
Glutaraldehyde
alkaline solution
mycobactericidal activity, 737
Glycerol
accumulation in yeasts
osmotic significance, 2119
*P. aeruginosa*
exotoxin A yields, 2013
*Glycine max*
localizations of aluminum, 2548
*Glycine max* (L.) Merrill
*B. japonicum*
nodule recovery and location, 1737
root nodule bacteria
conserved DNA region, 2253
*Glycine* spp.
influence of *B. japonicum* hydrogenase on growth, 610
Glycosides
digitoxin
reductive inactivation by *E. lentum*, 901
Glycosylation
*T. reesei*
ethanol perturbation, 463
Glyphosate
*Arthrobacter* sp. strain GLP-1
uptake, 974
Granular sludge
methanogenesis from acetate
inhibition by long-chain fatty acids, 403
Grape sour rot
analysis of associated yeast flora
chemical disease markers, 571
Grapes
*A. tumefaciens*
characterization of isolates, 1338
Grocery store produce
*A. caviae*
enumeration and characterization, 249
*A. hydrophila*
enumeration and characterization, 249
Groundwater
anoxic aquifers
cresol isomer biodegradation, 710
aquifer microbial communities
xenobiotic compound adaptation, 2212
xenobiotic compound degradation, 2212
aquifers
introduced genotypes, 996
arsenic-resistant bacteria
well water testing, 2929
subsurface sediments
protozoa distribution, 1157
unattached bacteria
growth determinations, 2991
Groundwater aquifers
introduced genotypes
maintenance and stability, 996
Growth assay
cellulase activity, 2935
Guanidine isothiocyanate
DNA isolation, 2588

*N*-Halamines
bactericidal activities, 2082
Halobacteria
heavy metals
susceptibility, 1199
Halogenated compounds
4-chloro-, 4-bromo-, and 4-iodobenzoate
hydrolytic dehalogenation, 810
2,4-dichlorobenzoate
reductive dechlorination to 4-chlorobenzoate, 810
nonadecafluoro-*n*-decanoic acid
effect on *A. laidlawii*, 1236
Halogenated hydrocarbons
methanogenic bacteria
production of ethane, ethylene, and acetylene, 1604
Halophiles
*V. vulnificus*
isolation from shellfish, 1556
Halophilic microorganisms
*V. parahaemolyticus*
*proBA* genes, 2733
salt tolerance, 466
Halotolerant microorganisms
cyanobacteria
sodium influx and salt tolerance, 1934
halobacteria
heavy metal susceptibility, 1199
*P. halophilus*
citrate metabolism, 1257
*V. cholerae*
U.S. West Coast estuaries, 1344
*V. vulnificus*
virulent estuarine strains, 1349
Heat
*L. pneumophila*
killing in a plumbing system, 447
Heavy metals
aluminum
localizations in soybeans, 2548
arsenic
bacterial resistance testing, 2929
*B. japonicum*
effects on soil populations, 315
cadmium
bacterivory effects, 2440
chelation
*Chlorella* spp., 2953
copper
*Anabaena* sp. strain 7120 copper toxicity moderation, 917
copper resistance plasmid, 454
*M. scrofulaceum* resistance and precipitation, 1951
relation to N-1, 1515
stressed *Y. enterocolitica*, 1768
halobacteria
susceptibility, 1199
iron
*A. chroococcum* hydroxamate production, 1418
anaerobic reduction, 2610
assay for aquatic sediments, 1536
iron-oxidizing bacteria, 846
magnetite formation, 2610
manganese
*C. cylindrosporum* sporulation, 1696
marine air-water interface bacteria
resistance, 2338
mercury
aquatic microbial communities, 2725
effects on *T. ferrooxidans* pyrite oxidation, 772
methylation and demethylation in lakes, 2397
mobilization by a mercury-resistant strain, 772
salinity effect on mercury-methylating activity, 261
*P. aeruginosa*
exotoxin A yields, 2013
selenium
selenite-resistant bacteria, 185
sodium
cyanobacterial nitrogen fixation, 1934
metabolizable-compound transport, 1487
stimulation of L-methionine transport, 2159
Herbicides
*s*-ethyl-*N*,*N*-dipropylthiocarbamate
degradation by *Arthrobacter* spp., 1088
glyphosate
uptake by an *Arthrobacter* sp., 974
metolachlor
metabolism by microorganisms, 390
High-fiber diets
swine
effect on fecal flora, 1638

High-oil diets
swine
effect on fecal flora, 1638
Homoacetogenic bacteria
*C. acetobutylicum*
lactate fermentation, 823
Hospital patient rooms
sanitization systems
microbiological evaluation, 1042
Host functions
mouse enterocyte enzymes
lactobacilli as effectors, 325
Hot springs
cyanobacterial mats
fermentation products, 2343
filamentous bacteria
evaluation with *Chloroflexus*-specific antiserum, 1962
*O. terebriformis*
diel vertical movements, 2142
survival in darkness, 2151
Human rotavirus strain Wa
antigenicity reduction rates, 1803
infectivity in fresh waters, 1803
Human T-lymphotropic virus type III/lymphadenopathy-associated virus
formaldehyde-based reagents
inactivation, 708
Humic water
dissolved organic carbon
bacterial growth, 482
Hydrocarbons
*A. calcoaceticus* BD4
emulsan activity, 440
alkene-utilizing bacteria
oxidation, 2903
toluene
induction and uptake, 2193
Hydrogen
butyrate-degrading triculture
metabolism kinetics, 434
*Methanosarcina* spp.
acetate degradation, 83
*R. leguminosarum*
uptake, 2539
recirculation
growth of methanogens, 946
Hydrogen peroxide
*S. aureus* MF-31
sensitivity of catalase-negative mutants, 1207
Hydrogen sulfide
thiobacilli
importance in growth, 1645
Hydrogenase
*B. japonicum*
cosmid-borne genes, 422
*D. vulgaris*
anaerobic biocorrosion, 1708
Hydrophobic-grid membrane filter
coliform analysis
comparison with standard methods, 1003
Hydrophobicity
ruminal bacteria
peptide utilization, 2021
Hydroxamate
*A. chroococcum*
iron-dependent production, 1418
Hypersecretion
*T. reesei*
ethanol perturbation, 463
*Hyphopichia burtonii*
*A. flavus* aflatoxin production
stimulation, 1142
Hypochlorite
*L. pneumophila* inactivation, 2983

Ice-nucleating bacteria
*P. syringae*
competitive exclusion, 2520
*Ictalurus punctatus*
*E. ictaluri* identification
rapid plasmid analysis, 1267
Imidazolidinones
*N*-halamines
bactericidal activities, 2082
Immobilization
pTG201 recombinant plasmid
influence on stability in *E. coli*, 740
Immunofluorescence
*S. cremoris* variant detection, 149
Immunofluorescence–DNA-fluorescence staining technique
*T. ferrooxidans*
enumeration in a population of acidophilic bacteria, 660
Incompatibility groups
*E. faecalis*
hemolysin-bacteriocin plasmids, 567
Indicator organisms
*B. fragilis* bacteriophages, 1632
*E. coli*
enumeration in sewage, 1246
sodium deoxycholate action, 1944
fecal bacteria
comparative survival, 1241
*P. aeruginosa*
Israeli coastal water, 1138
pathogenic bacteria
survival in freshwater sediments, 633
*S. aureus*
Israeli coastal water, 1138
sewage-polluted sediments
distribution, 1756
surface waters
correlation with *Campylobacter* spp., 523
total coliforms
enumeration in sewage, 1246
viruses
recovery from oysters, 2666
Indole
methanogenesis
conversion to oxindole, 180
Indole-3-acetic acid
*A. tumefaciens*
attachment to carrot cells, 2574
*B. japonicum*
5-methyltryptophan resistance, 1051
*P. tinctorius*
biosynthesis, 2908
production by pseudomonads, 1839
production by xanthomonads, 1839
Intestinal microorganisms
*O. formigenes*
rat intestine colonization, 2767
Inulinase
thermophilic bacterial strains
isolation and characterization, 942
Invasiveness
*Y. enterocolitica*
reduction by chlorine injury, 1358
Ionophores
antimicrobial activities
potassium ion concentrations, 2363

Iron
*A. chroococcum*
hydroxamate production, 1418
anaerobic reduction
magnetite formation, 2610
aquatic sediments
rapid assay, 1536
sediments
ferric iron reduction, 2636
Iron-oxidizing bacteria
Nordic Uranium Tailings Deposit
distribution, 846
Irradiation
*C. botulinum* types A and B
effects on growth and toxigenicity, 201
Isolation procedures
legionellae
relative sensitivities, 2704
Isotopes
stable-carbon-isotope fractionation
sulfur-oxidizing bacteria, 1940
Isozyme variation
*Frankia* spp., 1596

Jerusalem artichokes
thermophilic bacterial strains
isolation and characterization, 942

Kallar grass
*Azospirillum* spp.
oxygen tolerance in roots, 163
root interior
cross-reaction of nitrogen-fixing bacteria with enveloped, round bodies, 889
Killer yeasts
wine fermentation, 2171
Kinetics
aromatic compounds
biodegradation, 292
biodegradation
second-order rate coefficients, 1064
butyrate-degrading triculture
acetate, butyrate, and hydrogen metabolism, 434
*C. acetobutylicum*
homoacetic fermentation of lactate, 823
dissolved organic carbon
bacterial growth, 482
*p*-nitrophenol mineralization, 2617
*P. alcaligenes* growth
3-chlorobenzoate metabolism, 1846
*T. ferrooxidans*
growth on elemental sulfur, 1907
toluene induction and uptake, 2193
whey biomethanation
microbial ecophysiology, 1147
*Klebsiella planticola*
D-xylose
fermentation to ethanol, 2039
*Klebsiella* spp.
enumeration in cold water, 1716

Lactate
fermentation
*P. freudenreichii* subsp. *shermanii*, 1885
homoacetic fermentation
kinetics, 823
metabolism
citrate cycle intermediates, 2600
*S. cerevisiae*

transport, 509
Lactic acid bacteria
differential medium
enumeration, 1382
*P. acidilactici*
bacteriocin production, 2534
sucrose fermentation, 2534
*P. halophilus*
citrate metabolism, 1257
Lactic streptococci
bacteriophages
characterization and comparison, 1439
conjugal transfer of plasmid DNA, 898
conjugative mobilization, 2405
lactose metabolism
effect of oxygen, 533
*S. cremoris*
dipeptide transport, 2897
metalloendopeptidase, 2296
plasmid-determined abortive infection, 923
plasmid-determined restriction activity, 923
purification and properties of aminopeptidase A, 577
selection of protease variants, 309
*S. cremoris* R1
bacteriophage resistance plasmid pTR2030, 385
*S. cremoris* Wg2
cell wall-associated proteases, 853
specific promoters, 2452
*S. lactis*
conjugal transfer of plasmid genes, 352
malolactic fermentation mutants, 320
protoplast transfection, 2583
transformation, 1730
*S. lactis* subsp. *diacetylactis* 18-16
transposon Tn*917* delivery system, 74
*S. lactis* subsp. *diacetylactis* $WM_4$
bacteriocin production, 1171
lactose and bacteriocin plasmids, 1171
*S. lactis* subsp. *lactis*
cloning of chromosomal fragment, 1584
construction of strains, 1385
Lactobacilli
bacteriophage 0448
host strain interactions, 1850
host function effectors
mouse enterocyte enzymes, 325
identification, 2883
*L. casei*
lactose plasmid properties, 2987
*L. plantarum*
pyruvate conversion to acetoin, 1798
*L. sake*
arginine catabolism, 2683
plasmid pAMβ1
transfer to *E. faecalis*, 2693
*Lactobacillus acidophilus*
bacteriocin production and immunity
conjugal transfer of plasmid-encoded determinants, 553
betaine transport
effect on osmotolerance, 2275
*Lactobacillus bulgaricus*
bacteriophage 0448
host strain interactions, 1850
*Lactobacillus casei*
acid tolerance
membrane ATPases, 2124
bacteriophage-induced protoplasts
preparation and regeneration, 2686
lactose plasmid pLY101
properties, 2987
*Lactobacillus plantarum*
pyruvate conversion to acetoin, 1798
*Lactobacillus reuteri*
plasmid conjugal transfer, 2693
*Lactobacillus sake*
arginine catabolism, 2683
Lactose
*L. casei*
plasmid pLY101, 2987
metabolism in lactic streptococci
effect of oxygen, 533
*S. aureus*
phospho-β-galactosidase gene, 969
Lakes
bacterial nitrate reduction rates
estimation, 217
*C. minus*
cell-size change, 864
dissolved organic carbon
bacterial growth, 482
Lake Biwa, Japan
bacterioplankton production rate, 2872
mercury methylation and demethylation
seasonal and spatial variations, 2397
microbial metabolism
flowthrough reactor flasks, 371
mineralization of organic chemicals
acclimation period, 791
strip mine lakes
algal and bacterial activities, 2069
Landfills
3-chlorobenzoate
metabolism, 1846
Larvicides
*B. sphaericus*
toxin activation, 1333
*B. thuringiensis*
delta-endotoxin specificity, 500
*B. thuringiensis* subsp. *israelensis*
lectinlike mosquito receptor, 2650
mosquitocidal protein purification, 1316
simulated field conditions, 828
toxins, 1251
*B. thuringiensis* subsp. *kurstaki*
trypsin digest fragment, 416
*B. thuringiensis* subsp. *morrisoni*
toxins, 1251
Leaching
low-sulfur coal
microbial mediation, 1056
strip mine lakes
algal and bacterial activities, 2069
*T. ferrooxidans*
growth on elemental sulfur, 1907
*Legionella pneumophila*
control in cooling towers, 1775
inactivation by a chloramine, 2983
inactivation by hypochlorite, 2983
killing in a plumbing system
methods and assessment, 447
survival and multiplication
drinking water systems, 979
*Legionellaceae*
Puerto Rican waters
abundance and distribution, 2231
Legionellae
environmental sites
sampling protocol, 1454
selective isolation
relative sensitivities, 2704
Leonardite coal
solubilization by *C. versicolor*, 2844
solubilization by *P. versicolor*, 2840
*Leptochloa fusca*
*Azospirillum* spp.
oxygen tolerance in roots, 163
*Leucaena leucocephala*
soil solution phosphorus status
mycorrhizal dependency, 797
*Leuconostoc dextranicum*
nisin plasmid genes
conjugal transfer, 352
*Leuconostoc mesenteroides*
protoplast formation and regeneration, 1694
Light adaptation
benthic cyanobacterial mat
photosynthetic action spectra, 879
Lignin
degradation
initial steps, 2642
selection and improvement of microorganisms, 242
*P. acidovorans* $D_3$
metabolism, 2605
*P. chrysosporium*, 1464
*Xanthomonas* sp. strain 99
degradation, 2242
Lignin peroxidase
wood degradation, 2384
Ligninase
lignin-degrading microorganisms
selection and improvement, 242
*Xanthomonas* sp. strain 99
influence on lignin degradation, 2242
Lignocellulose
degradation by *Streptomyces* spp.
enzyme activities, 2754
degradation in the bovine rumen, 1987
*Streptomyces* spp.
cellulolytic enzyme system, 2835
xylanolytic enzyme system, 2835
Lime
*T. subterraneum* L.
influence on nodulation by *R. trifolii*, 2090
Lipases
bacterial lipases
plate assay, 211
Lipids
*C. acetobutylicum*
composition and butanol challenge, 2854
surface-active agents
*Bacillus* spp., 224
wetting agents
*S. marcescens* mutants, 1186
*Listeria monocytogenes*
detection, 2256
refrigerated cabbage
detection and enumeration, 955
survival in milk, 1433
*Lotus pedunculatus*
rhizobia
identification, 1705
Lyme disease
*B. burgdorferi*
prevalence in mice on islands inhabited by white-tailed deer, 892
Lysis
*B. subtilis*
esters of fatty acids, 505

Lysostaphin
*S. aureus*
lysis procedure, 88
Lysozyme
antibacterial activity, 2165

Magnesium
*M. mazei* S-6
effect on morphology, 1699
Magnetite
formation
biogeochemical conditions, 2610
Maize
rhizobacteria
antifungal activities, 1866
Malate dehydrogenase
*S. aureofaciens*
medium for accumulation, 1913
Maleates
*C. botulinum*
growth inhibition, 110
Malolactic fermentation
*S. lactis*
mutant selection, 320
Mammalian cells
baculoviruses
interaction, 1412
FRhK-4 cells
hepatitis A virus-induced pathology, 2967
Mammals
reservoirs for *Campylobacter* spp., 1574
Manganese
*C. cylindrosporum*
sporulation, 1696
Mangrove
marine zoosporic fungus, 2464
Marine air-water interface
bacteria
antibiotic resistance, 2338
heavy metal resistance, 2338

*Klebsiella* spp. enumeration, 1716
*L. monocytogenes*
detection and enumeration in cabbage, 955
lactic acid bacteria
differential medium, 1382
malate dehydrogenase accumulation, 1913
methanogenic enrichment culture
propionate degradation, 1589
multitest (VC) medium
*V. cholerae* identification, 1203
*P. aeruginosa*
exotoxin A yield, 2013
*P. cepacia*
enumeration and recovery, 2265
population density of microorganisms in liquid media
immersible probe for continual monitoring, 618
*Pseudomonas* spp.
isolation from water, 895
*S. cremoris*
protease variants, 309
*S. lactis*
malolactic fermentation mutants, 320
sewage and surface water coliforms
enumeration, 1246
sodium deoxycholate
action on *E. coli*, 1944
tuberculocidal activity of disinfectants
measurement, 2189
*V. cholerae*
selection and differentiation, 2262
*V. vulnificus*
selection and differentiation, 2262
*V. vulnificus* isolation, 1556
VC medium
*V. cholerae* identification, 1203
vermiculite
bacterial inoculant production, 2138
*Medicago sativa*
green juice
microbial coagulation, 2206
*R. meliloti*
symbiotic bacteroid differentiation, 1947
Membrane filters
alkaline glutaraldehyde solution
measurement of mycobactericidal activity, 737
fecal coliform enumeration
comparison of four methods, 2922
Membrane filtration
fecal coliform enumeration, 2922
ozonated wastewater
*E. coli* recovery, 2894
sewage and surface water coliforms
enumeration, 1246
Membranes
*A. viscosus*
ATPases, 2124
*B. cereus*
nitrite, 79
sulfhydryl group modification, 79
*C. acetobutylicum*
fluidity and butanol challenge, 2854
proton conductance, 782
*C. thermoaceticum*
proton conductance, 782
*E. coli*
permeability and metabolites, 2445
*L. casei*
ATPases, 2124
*S. cerevisiae*
monocarboxylate transport, 509
*S. cremoris*
consecutive peptidase reactions, 1482
*S. cremoris* membrane-bound aminopeptidase A
purification and some properties, 577
yeast cell membranes
adaptation to ethanol, 1196
Mercury

aquatic environments
microbial adaptation, 2725
methylation and demethylation in lakes
seasonal and spatial variations, 2397
salinity effect, 261
*T. ferrooxidans*
mobilization by a mercury-resistant strain, 772
pyrite oxidation, 772
Mesquite
rhizobial ecology, 36
Metallothionein
cloned monkey metallothionein
expression in *E. coli*, 204
*Methanobacterium ivanovii*
auxotrophic mutants
acetate auxotroph characterization, 1387
isolation, 1387
*Methanobacterium thermoautotrophicum*
butyrate degradation
syntrophy, 429
*Methanococcus* spp.
nutrition
amino acids and vitamins, 2373
*Methanococcus voltae*
analog-resistant mutants
isolation, 1822
purines and pyrimidines
incorporation, 1822
Methanogenesis
acetate in granular sludge
inhibition by long-chain fatty acids, 403
alder swamp
dynamics, 2554
butyrate degradation
syntrophy, 429
butyrate-degrading triculture
metabolism kinetics, 434
enrichment culture
propionate degradation, 1589
ethane, ethylene, and acetylene
production, 1604
growth of microorganisms
high-pressure equipment, 1876
$H_2$-$CO_2$ recirculation
mass culture, 946
indole
conversion to oxindole, 180
*M. barkeri*
stable carbon isotope fractionation, 2597
*M. ivanovii*
acetate auxotroph characterization, 1387
auxotrophic mutant isolation, 1387
*M. mazei* S-6
morphology, 1699
spontaneous disaggregation, 2500
*M. soehngenii* VNBF
activity, 2978
*M. voltae*
analog-resistant mutants, 1822
*Methanococcus* spp.
nutrition, 2373
*Methanosarcina* spp.
genetic techniques, 2500
microbial metabolism
study in sediments, 371
mixed methanogenic cultures
toluene and benzene transformation, 254
oxindole
conversion from indole, 180
pH control
mass culture, 946
propionate catabolism, 2260
sediments
competitive inhibition, 2636
syntrophic cocultures
separation of *S. wolfei* from *M. hungatii*, 1183
whey biomethanation
microbial ecophysiology, 1147
*Methanosarcina barkeri*
stable carbon isotope fractionation, 2597
*Methanosarcina mazei*
morphology
factors, 1699
spontaneous disaggregation
genetic technique development, 2500
*Methanosarcina* spp.
acetate degradation
hydrogen pressure, 83
pregrowth with hydrogen, 83
genetic techniques, 2500
*Methanospirillum hungatii*
syntrophic cultures
separation from *S. wolfei*, 1183
*Methanothrix soehngenii*
methanogenic activity, 2978
Methionine
methylated sulfur compounds
anoxic salt marsh sediments, 2426
L-Methionine
transport in *B. linens*
stimulation by $Na^+$, 2159
6-Methyl-1,2,4-benzenetriol
*P. cyclopium*
penicillic acid biosynthesis, 1531
Methylated sulfur gases
biogenic emission, 1626
O-Methylation
halogen-substituted phenols, 839
Methylmercaptan
thiobacilli
importance in growth, 1645
Methylotrophic bacteria
W3A1
pyrroloquinoline quinone production, 2183
*O*-Methylsterigmatocystin
*A. parasiticus*
aflatoxin precursor, 1028
5-Methyltryptophan
resistant *B. japonicum*
indole-3-acetic acid content, 1051
4-Methylumbelliferyl-*N*-acetyl-β-D-glucosaminide
rapid test for chitinase, 1718
Metolachlor
metabolism by microorganisms, 390
Mice
*C. pintolopesii* 108-1
mitochondrial DNA, 345
islands inhabited by white-tailed deer
prevalence of *B. burgdorferi* and *B. microti*, 892
mucosa-associated microbial populations, 1965
*Y. enterocolitica*
survival and virulence, 1768
Microbial challenge testing
cosmetic products
correlation with consumer use testing, 1827
Microbial coagulation
alfalfa green juice, 2206
*Micromonospora* spp.
transfection, 2544
Microwave radiation
dry state sterilization, 2133
Microzones
oxygen-poor microzones
nitrogen fixation, 1078
Milk
*L. monocytogenes*
survival during pasteurization, 1433
*S. lactis* subsp. *lactis*
cloning of chromosomal fragment, 1584
Mineralization
aquifer microbial communities
xenobiotic compounds, 2212
degradation of chlorinated phenols
pentachlorophenol-degrading bacterium, 907
metolachlor
metabolism by microorganisms, 390
naphthalene biodegradation
metabolites, 129
rates, 129
*p*-nitrophenol
kinetics, 2617
organic chemicals
acclimation period, 791
*Xanthomonas* sp. strain 99
lignin, 2242
Mines
Nordic Uranium Tailings Deposit
iron-oxidizing bacteria, 846
Minitek system
*Bacillus* sp. characterization, 2680
Molasses
Quin's oval, 1273
sheep rumens, 1273
Molds
aflatoxin-producing molds
screening by UV photography, 230
soy sauce koji mold
toxicity, 1980
Molecular size
lignin
degradation, 2242
Mollicutes
*S. citri*
detection, 183
Molybdate
anoxic marine sediments
ammonium production, 2435
Moniliformin
*Fusarium* spp.
formation in rice culture, 196
Monoclonal antibodies
radioimmunoassay
ochratoxin A detection, 514
vesicular-arbuscular mycorrhizal fungi
identification, 2222
Monosaccharides
lactobacillus identification, 2883
Monosubstituted phenols
biodegradation in aquatic environments
effect of adaptation to phenol, 1496
Mosquitoes
*B. sphaericus*
toxin activation, 1333
*B. thuringiensis* subsp. *israelensis*
lectinlike receptor, 2650

mosquitocidal protein purification, 1316
Most-probable-number statistics
direct enumeration of microorganisms, 1327
Motility
*O. terebriformis*
diel vertical movements, 2142
*P. syringae*
epiphytic fitness, 2528
Mountain meadows
*Campylobacter* spp.
mammals as reservoirs, 1574
*Giardia* spp.
mammals as reservoirs, 1574
mRNA
*P. fluorescens* B52
effect of temperature shifts, 1973
Mucosae
microbial populations
colons of mice, 1965
Municipal water systems
*L. pneumophila*
survival and multiplication, 979
Mushrooms
*A. bisporus* (Lang) Sing
hyphae-bacteria interactions, 1132
*A. bitorquis*
DNA restriction fragment length polymorphisms, 816
*A. brunnescens*
DNA restriction fragment length polymorphisms, 816
*Pleurotus* spp.
delignification of wheat straw, 1304
Muskrats
*Giardia* spp. presence, 1790
*Salmonella* spp. absence, 1790
Mycobacteria
alkaline glutaraldehyde solution
mycobactericidal activity, 737
*Mycobacterium bovis* BCG
tuberculocidal activity of disinfectants, 2189
*Mycobacterium convolutum*
1-chlorohexadecane
chlorinated fatty acid distribution, 10
*Mycobacterium scrofulaceum*
copper resistance and precipitation, 1951
Mycoplasmas
*A. laidlawii*
effect of nonadecafluoro-*n*-decanoic acid, 1236
Mycotoxins
*A. fumigatus*
tremorgenic mycotoxins, 787
antibodies
production and characterization, 17
*B. fibrisolvens* specific growth rate and toxin degradation in vitro
effects of several mycotoxins, 613
deepoxy trichothecenes
preparation and characterization, 2821
4,15-diacetoxyscirpenol
preparation, 460
moniliformin
formation by *Fusarium* spp., 196
ochratoxin A
*P. verrucosum*, 266
*P. viridicatum*, 266
penicillic acid
6-methyl-1,2,4-benzenetriol, 1531
*S. atra*
aerosolized conidia, 1370
scirpentriol
preparation, 457
T-2 toxin
biosynthesis blockage, 1855, 1860
effect on growth of ruminal bacteria, 587
metabolism by ruminal bacteria, 587
triacetoxyscirpenol
preparation, 457

N-1
relation to copper, 1515
Naphthalene
biodegradation in microcosms
metabolites, 129
rates, 129
Naphthalenesulfonates
microbial desulfonation, 1459
Natural oak savanna
*Agrobacterium* spp. biovars
isolation, 717
Neurotoxins
tetrodotoxin
production by marine bacteria, 1714
Nikkomycin
*S. tendae*
plasmid transformation, 1
Nisin
plasmid genes
conjugal transfer, 352
Nitrate
aquifer soil
denitrification, 1292
nearshore marine sediments
denitrification, 1292
oxygen regulation of uptake
denitrifying *P. aeruginosa* cultures, 745
Nitrate reduction
rates in freshwater sediments
estimation, 217
Nitrification
nitrifying bacteria in wastewater reservoirs, 754
Nitrite
*B. cereus*
bacteriostatic action, 79
sulfhydryl group modification, 79
Nitrogen
depleted aerobic marine waters
oxygen-poor microzones, 1078
nitrosubstituted aromatic compounds
nitrogen source for bacteria, 208
Nitrogen fixation
*A. brasilense* Sp7
transposon mutagenesis, 410
*A. chroococcum*
hydroxamate production, 1418
*A. lipoferum* SpBr17
transposon mutagenesis, 410
*A. vinelandii* ATCC 12837
growth on soil nutrients, 489
aluminum
localizations in soybeans, 2548
*B. japonicum*
competition for nodulation, 2631
cosmid-borne hydrogenase genes, 422
DNA region mapping, 2247
genotype-specific nodulation, 2624
indole-3-acetic acid content, 1051
influence of hydrogenase on growth of *Glycine* and *Vigna* spp., 610
interactions with the environment, 1113
5-methyltryptophan resistance, 1051
nodulation and competition, 1113
nodule recovery and location, 1737
cyanobacteria
sodium influx and salt tolerance, 1934
*Frankia* sp. strain FaC1 genes
isolation and characterization, 2321
*Frankia* spp.
protoplast formation and regeneration, 53
gas-utilizing enzymes
acetylene effects, 298
marine microbial mats
interactions with photosynthesis, 2353
*N. commune*
phospholipid fatty acids and carotenoids, 4
nitrogen-depleted aerobic marine waters
oxygen-poor microzones, 1078
nitrous oxide
reduction in nodules, 1168
*P. glandulosa*
rhizobial ecology, 36
*R. leguminosarum*
conserved plasmid sequences, 2539
*R. meliloti*
symbiotic bacteroid differentiation, 1947
*R. trifolii*
influence of soil and nonsoil environments on nodulation, 596
*T. subterraneum* systemic response, 1611
rhizobia
variable effectiveness, 2972
rhizobium inoculation of *C. cajan*
increased rhizobium effectiveness, 2066
*Rhizobium* spp.
genetic exchange of plasmids, 2942
root interior of Kallar grass
cross-reaction of nitrogen-fixing bacteria with enveloped, round bodies, 889
*p*-Nitrophenol
mineralization by a *Pseudomonas* sp.
kinetics, 2617
mineralization of organic chemicals
acclimation period, 791
Nitrosubstituted aromatic compounds
nitrogen source for bacteria, 208
Nitrous oxide
*P. aeruginosa*
$N_2O$ reductase activity, 2045
reduction in nodules, 1168
Nitrous oxide reductase
*P. aeruginosa*
growth on $N_2O$, 2045
"*Nocardia paraffinicum*" (*Rhodococcus rhodochrous*)
propane catabolism
carbon dioxide, 65
Nonadecafluoro-*n*-decanoic acid
*A. laidlawii*
cytotoxic and cytolytic activity, 1236
Nordic Uranium Tailings Deposit
iron-oxidizing bacteria
distribution, 846
*Nostoc commune*
phospholipid fatty acids and carotenoids
desiccation, 4

geographic location and variation, 4
Nuclear magnetic resonance spectroscopy
propionate catabolism, 2260
*E. coli*
proline excretion, 2445
*Pseudomonas* sp.
metabolism of acetate and phenol, 156
Nuclease
*S. marcescens*
screening of production, 2593

Ochratoxin A
detection
monoclonal antibody-based assay, 514
*P. viridicatum*
production, 266
Odor control
pigs
degradation of malodorous substances, 137
Oil
*A. calcoaceticus* RA57
plasmid involvement in growth, 1918
oil field core flood experiments
slime-producing bacteria, 278
Oil sludge
dinitrogen-fixing bacteria, 1674
Oligonucleotide probes
*B. thuringiensis* genes
relatedness, 2808
Olive fruit fly
cricket paralysis virus
control agent, 142
Olives
cricket paralysis virus
olive fruit fly control agent, 142
O-Methylation
halogen-substituted phenols, 839
*Ondatra zibethicus*
*Giardia* spp. presence, 1790
*Salmonella* spp. absence, 1790
Oocysts
*Cryptosporidium* sp. oocysts in river water
identification, 672
Opine-utilizing bacteria
diversity
coryneform isolates, 1519
Organic dust
separation from microorganism suspensions
aqueous polymer two-phase systems, 860
Organic thiols
methylation by *T. thermophila*, 2111
*Oscillatoria terebriformis*
diel vertical movements, 2142
survival in darkness, 2151
Osmotic pressure
yeasts
glycerol accumulation, 2119
Osmotolerance
*L. acidophilus*
effect of betaine transport, 2275
*V. parahaemolyticus*
*proBA* genes, 2733
Oxalate
microbial degradation, 1793
*Oxalobacter formigenes*
rat intestine colonization, 2767
Oxindole
methanogenesis
conversion from indole, 180

Oxygen
*C. pintolopesii* 108-1
factor in colonization, 345
Kallar grass roots
*Azospirillum* spp. tolerance, 163
lactose metabolism
effect in lactic streptococci, 533
nitrate uptake regulation
denitrifying *P. aeruginosa* cultures, 745
nitrogen-depleted aerobic marine waters
oxygen-poor microzones, 1078
tolerance
*Azospirillum* spp., 163
Oysters
recovery of *V. cholerae*
elevated temperature method, 1181
virus recovery methods, 2666
Ozone
inactivation of animal viruses, 2218
*L. pneumophila*
killing in a plumbing system, 447
sporicidal activity, 683
wastewater treatment
*E. coli* recovery, 2894

*Pachysolen tannophilus*
xylulokinase gene cloning, 2975
Pantoyl lactone
racemic mixture
one-step conversion, 519
D-(−)-Pantoyl lactone
conversion from pantoyl lactone, 519
Parasexual processes
*Claviceps* spp.
induction, 70
Particle counters
Elzone particle counter
seawater bacterial biomass, 274
Pasteurization
*L. monocytogenes*
survival in milk, 1433
Pathogenic bacteria
survival in freshwater sediments, 633
Peanuts
drought-stressed kernels
*A. flavus* challenge, 270
Peas
*R. leguminosarum* biovar *viceae*
enzyme polymorphism, 397
Peat
sulfate reduction, 1406
Pectate lyase
*E. carotovora*
purification procedure, 1189
*Pediococcus acidilactici*
bacteriocin production, 2534
sucrose fermentation, 2534
*Pediococcus halophilus*
citrate metabolism, 1257
Penicillic acid
*P. cyclopium*
6-methyl-1,2,4-benzenetriol, 1531
*Penicillium bilaji*
inoculation of wheat and field beans
increased P uptake, 2699
*Penicillium camemberti*
related common cheese contaminants
antigenic characterization, 872
*Penicillium caseicolum*
ergosterol biosynthesis inhibitors
resistant mutants, 1500
*Penicillium cyclopium*
penicillic acid biosynthesis
6-methyl-1,2,4-benzenetriol, 1531
*Penicillium verrucosum*
ochratoxin A
production, 266
*Penicillium viridicatum*
ochratoxin A
production, 266
Pentachlorophenol
effects on bacteria, 2689
Peptidases
*S. cremoris*
consecutive reactions, 1482
Peptides
*S. cremoris*
transport regulation, 2897
uptake by ruminal bacteria
effect of hydrophobicity, 2021
*Peptococcus niger*
steroid sulfatase activity, 1655
Perchloroethene
dechlorination, 2671
Percoll gradients
syntrophic cocultures
separation of *S. wolfei* from *M. hungatii*, 1183
Pesticides
baculovirus polyhedra
measurement of surface charge, 598
baculoviruses
interaction with nontarget organisms, 1412
nuclear polyhedrosis virus
survival, 2771
precocene II
transformation by *S. griseus*, 1780
Petroleum refining
oily sludge
dinitrogen-fixing bacteria, 1674
pH
anaerobic microorganisms
adaptations to low pH, 57
*B. succinogenes*
growth and proton motive force, 2379
*C. botulinum*
sorbic acid inhibition, 935
*M. mazei* S-6
effect on morphology, 1699
nuclear polyhedrosis virus
effect on survival, 2771
propionate degradation
methanogenic enrichment culture, 1589
*S. cerevisiae*
ethanol production, 1286
*S. cremoris*
selection of protease variants, 309
*S. cremoris* dipeptides
regulation of transport, 2897
*S. typhimurium*
growth on glucose-mineral salts, 1311
streams
bacterial communities, 337
*Phanerochaete chrysosporium*
basidiospore formation, 1464
DDT biodegradation, 2001
lignin degradation
selection and improvement, 242
mating system, 1464
*Phaseolus vulgaris*
P uptake
influence of fungi, 2699
Phenol

metabolism by a *Pseudomonas* sp.
nuclear magnetic resonance spectroscopy, 156
Phenolic acids
rumenlike fermentation
effect, 1046
Phenolics
rumenlike fermentation
effect, 1046
Phenols
chlorinated phenol degradation
pentachlorophenol-degrading bacterium, 907
halogen-substituted phenols
bacterial O-methylation, 839
*Phoma lingam* (Tode) Desm.
antifungal substances
isolation procedures, 966
kinetics, 966
Phomenoic acid
*P. lingam* (Tode) Desm.
isolation procedures, 966
kinetics of biosynthesis, 966
Phomenolactone
*P. lingam* (Tode) Desm.
isolation procedures, 966
kinetics of biosynthesis, 966
*Phormidium* sp. strain J-1
flocculant characterization, 2226
Phosphate
*T. subterraneum* cv. Mt. Barker
influence on nodulation by *R. trifolii*, 2098
*T. subterraneum* L.
influence on nodulation by *R. trifolii*, 2090
Phosphine
*Aspergillus* spp.
aflatoxin production, 2328
Phospho-β-galactosidase
*S. aureus*
nucleotide and deduced amino acid sequence of gene, 969
Phospholipids
*M. convolutum*
chlorinated fatty acid distribution, 10
*N*-[Phosphonomethyl]glycine
Arthrobacter sp. strain GLP-1
uptake, 974
Phosphorus
*Arthrobacter* sp. strain GLP-1
glyphosate uptake, 974
field beans
P uptake, 2699
*L. leucocephala*
mycorrhizal dependency, 797
wheat
P uptake, 2699
Photosynthesis
action spectra
benthic cyanobacterial mat, 879
marine microbial mats
interactions with $N_2$ fixation, 2353
Phototaxis
*R. littoreum*, 1819
Phototrophic purple bacteria
dimethyl sulfide
oxidation to dimethyl sulfoxide, 2026
Physical disruption
attached bacteria
influence on growth, 2996
Phytoalexins
drought-stressed peanut kernels
*A. flavus* challenge, 270
*Phytophthora vesicula*
mangrove leaf occupation, 2464
Phytoplankton
flow cytometric analysis
effects, 2677
Pigeon pea
inoculation with competitive rhizobia
increased rhizobium effectiveness, 2066
Pigeons
*Campylobacter* spp.
isolation from feces, 1394
Pigmentation
marine air-water interface bacteria, 2338
*S. marcescens*
relationship to glucose-6-phosphate dehydrogenase alloenzymes, 1983
Pigs
cellulolytic bacteria
dietary fiber, 22
dietary fiber
xylanolytic and cellulolytic bacteria, 22
fecal bacteria
resistance to antimicrobial agents, 1307
fecal flora
high-fiber and high-oil diet, 1638
feces
obligate anaerobe isolation, 189
ureolytic bacteria
effect of Aureo SP250, 2009
effect of clinoptilolite, 2009
effect of dietary copper sulfate, 2009
waste
degradation of malodorous substances, 137
xylanolytic bacteria
dietary fiber, 22
Pili
*B. japonicum*
attachment to host roots, 1959
*P. fluorescens*
attachment to corn roots, 1397
production, 1397
*Pinus* spp.
*P. tinctorius* ectomycorrhizae
indole-3-acetic acid biosynthesis, 2908
*Pisolithus tinctorius*
indole-3-acetic acid biosynthesis, 2908
*Pisum sativum*
*R. leguminosarum* biovar *viceae*
enzyme polymorphism, 397
Planktonic bacteria
heterotrophic activity
seasonal variation, 2308
population density
seasonal variation, 2308
Plant residues
ruminal fungi
assessment with chitinase, 1955
Plaque microorganisms
*A. viscosus*
acid tolerance, 2124
*L. casei*
acid tolerance, 2124
Plasmids
*A. calcoaceticus* RA57
growth on crude oil, 1918
*Arthrobacter* spp.
*s*-ethyl-*N*,*N*-dipropylthiocarbamate degradation, 1088
*B. japonicum*
cosmid-borne hydrogenase genes, 422
*B. subtilis*
pAMβ1 deletion, 2458
staphylococcal protein A production, 379
*B. thuringiensis*
transfer, 1525
*C. michiganense* subsp. *sepedonicum*
homology with DNA, 2476
*C. sepedonicum*
homology with DNA, 2476
conjugal transfer of plasmid DNA
streptococci, 898
copper resistance plasmid
*P. syringae* pv. *tomato*, 454
*E. coli* HB101
mobilization of plasmid pHSV106, 665
*E. coli* JM105(pKK223-200)
stability, 1548
*E. coli* K-12
aspartase production, 2800
*E. faecalis*
hemolysin-bacteriocin plasmids, 567
*E. ictaluri* from *I. punctatus*
rapid plasmid analysis, 1267
freshwater environment
transduction potential, 987
groundwater aquifers
introduced genotypes, 996
*L. acidophilus* 88 bacteriocin production and immunity
conjugal transfer of plasmid-encoded determinants, 553
*L. casei*
lactose plasmid properties, 2987
lactic streptococci
conjugative mobilization, 2405
*M. scrofulaceum*
copper resistance and precipitation, 1951
marine air-water interface bacteria, 2338
mobility
genetic engineering, 105
nisin plasmid genes
conjugal transfer, 352
*P. acidilactici*
bacteriocin production, 2534
sucrose fermentation, 2534
pAMβ1
conjugal transfer, 2693
major specific deletion, 2458
pCS1
*C. michiganense* subsp. *sepedonicum*
DNA, 2476
pLY101
properties, 2987

*Streptococcus lactis* subsp. *diacetylactis*
bacteriocin production
*Bcl*I fragment cloning, 1171
lactose and bacteriocin plasmids
restriction enzyme analysis, 1171
*Streptococcus lactis* subsp. *lactis*
chromosomal fragment
cloning, 1584
construction of strains, 1385
*Streptomyces aureofaciens*
malate dehydrogenase accumulation
medium, 1913
*Streptomyces clavuligerus*
plasmid transformation, 1376
*Streptomyces galilaeus*
temperate bacteriophage, 2708
*Streptomyces griseus*
precocene II transformation, 1780
*Streptomyces lividans*
*T. fusca* cellulase gene
expression, 1470
*Streptomyces* spp.
cellulolytic enzyme system
induction, 2835
lignocellulose degradation
enzyme activities, 2754
xylanolytic enzyme system
induction, 2835
*Streptomyces tendae*
nikkomycin genetic studies
plasmid transformation, 1
plasmid transformation, 1
Stringent response
*Clostridium* spp.
sorbic acid, 1020
Strip mine lakes
algal and bacterial activities, 2069
Substrate affinity
*E. carotovora*
pectate lyase purification, 1189
marine bacteria, 2332
*S. bovis*
disaccharides, 2388
Subterranean clover
nodulation by *R. trifolii*
influence of lime and phosphate, 2090
influence of phosphate, 2098
*Rhizobium* infection
systemic response, 1611
Succinate dehydrogenase
*R. meliloti*
symbiotic bacteroid differentiation, 1947
Sucrose
*P. acidilactici*
fermentation, 2534
Sugar
cellulase activity
analysis of samples, 2935
*L. mesenteroides*
protoplast formation and regeneration, 1694
Sugarbeets
*Pseudomonas* spp.
root colonization, 1164
Sulfate reduction
alder swamp
dynamics, 2554
biofilms
dynamics and kinetics, 27
*D. carbinolicus* sp. nov.
properties, 802
*D. vulgaris*
anaerobic biocorrosion, 1708
mercury-methylating activity
salinity effect, 261
microbial metabolism
study in sediments, 371
peat, 1406
sediments
competitive inhibition, 2636
Sulfate-respiring bacteria
selenate
reduction to selenide, 1365
Sulfonoaromatic compounds
microbial desulfonation, 1459
Sulfur
hot spring microbial mats
*O. terebriformis* movement, 2142
low-sulfur coal
microbially mediated leaching, 1056
methylated compounds
anoxic salt marsh sediments, 2426
methylated sulfur gases
biogenic emission, 1626
*O. terebriformis*
survival in darkness, 2151
oxidation by bacteria
stable-carbon-isotope fractionation, 1940
*P. occultum*
reduction, 1690
sulfate reduction in peat, 1406
*T. ferrooxidans*
growth on $S^0$, 1907
*T. thermophila*
sulfide methylation, 2111
thiol methyltransferases
widespread occurrence, 1626
Sulfur bacteria
*Thiothrix* spp.
ultrastructure, 1560
"type 021N" bacteria
ultrastructure, 1560
Sulfur-oxidizing bacteria
chemoautotrophic growth
stable-carbon-isotope fractionation, 1940
Surface-active agents
*Bacillus* spp., 224
Surfaces
*A. circularis* PCC 6720
flocculant characterization, 2226
cell wall hydrophobicity
role in bacterial adhesion, 1893, 1898
leaves
ice-nucleating *P. syringae*, 2520
marine air-water interface bacteria
adhesion, 2338
ozone
sporicidal activity, 683
*Phormidium* sp. strain J-1
flocculant characterization, 2226
*Vibrio* spp.
attachment to stainless steel, 1175
Surfactants
heterogeneous aerobic culture
influence, 2567
Survival
bacteria in egg washwater, 2060
nuclear polyhedrosis virus, 2771
selected bacterial species
activated carbon filters, 777
Suspensions
organic dust in microorganism suspensions
separation, 860
Svalbard reindeer
cecal microorganisms
seasonal changes, 114
Swamps
sulfate reduction in peat, 1406
Swine
fecal flora
high-fiber and high-oil diets, 1638
Sylviculture
*Frankia* spp.
isozyme variation, 1596
Symbiosis
*B. japonicum*
DNA region mapping, 2247
soybean root nodule bacteria
conserved DNA region, 2253
*Syncephalastrum racemosum*
7,12-dimethylbenz[*a*]anthracene
stereoselective metabolism, 2560

*Syntrophomonas wolfei*
syntrophic cultures
separation from *M. hungatii*, 1183
Syntrophy
butyrate degradation
coculture and triculture, 429
Percoll gradients
separation of *S. wolfei* from *M. hungatii*, 1183

T-2 toxin
biosynthesis blockage
ancymidol, 1860
mutant isolation and characterization, 1855
*F. sporotrichioides*
comparative yields, 693
metabolism by ruminal bacteria and effect on their growth, 587
Tallgrass prairie
*Agrobacterium* spp. biovars
isolation, 717
Tampons
vaginal microflora
qualitative assessment, 2779
quantitative assessment, 2774
Temperature
anaerobic rumen fungus
growth and fermentation on various carbon sources, 1210
bacterioplankton
seasonal variations, 2282
*C. acetobutylicum*
effect, 2854
microwave sterilization, 2133
nuclear polyhedrosis virus
effect on survival, 2771
*P. fluorescens* B52
effect on mRNA pools, 1973
propionate degradation
methanogenic enrichment culture, 1589
*S. aureus* MF-31
heat sensitivity of catalase-negative mutants, 1207
sporogenous bacterial populations
anaerobic sewage digestion, 2414
Tertiary amine
covalent bonding to polystyrene fiber
antimicrobial activity, 2050
*Tetrahymena thermophila*
organic thiol methylation, 2111
selenide methylation, 2111
sulfide methylation, 2111
Tetrodotoxin
production by marine bacteria, 1714
Thermal resistance
*L. monocytogenes*
survival in pasteurized milk, 1433
*Thermomonospora curvata*
cellobiose utilization, 1743
*Thermomonospora fusca*
cellulase gene
expression in other organisms, 1470
β-1,4-endoglucanase
regulation of synthesis, 1352
Thermophiles
*B. stearothermophilus* ATCC 12980
spore inactivation and injury, 365
butyrate degradation
syntrophy, 429
butyrate-degrading triculture
metabolism kinetics, 434
cellulolytic anaerobic extreme thermophiles
isolation from New Zealand thermal sites, 832
*Chloroflexus* spp.
specific antiserum, 1962
*Clostridium* isolate
thermostable amylolytic enzymes, 1661
*Clostridium* sp. strain EM1
enzyme production, 1668
hot spring cyanobacterial mats
fermentation products, 2343
inulinase-producing strains
isolation and characterization, 942
methanogens
growth on gaseous substrates, 1876
*O. terebriformis*
diel vertical movements, 2142
survival in darkness, 2151
*P. occultum*
sulfur reduction, 1690
*S. thermophile*
cellulase activity, 2175
cellulose degradation, 2175
growth, 2175
*T. fusca*
cellulase gene expression, 1470
endocellulase synthesis regulation, 1352
Thermoplastics
acrylonitrile butadiene styrene
renal dialysis water system, 1322
Thin-layer chromatography
wetting agent production
*S. marcescens* mutants, 1186
Thiobacilli
growth
concrete corrosion, 1645
*Thiobacillus ferrooxidans*
cinnabar
mobilization by a mercury-resistant strain, 772
pyrite oxidation, 772
enumeration in a population of acidophilic bacteria
combined immunofluorescence–DNA-fluorescence staining technique, 660
growth on elemental sulfur, 1907
Thiol methyltransferases
widespread occurrence, 1626
Thiosulfate
thiobacilli
importance in growth, 1645
*Thiothrix* spp.
ultrastructure, 1560
[$^3$H]thymidine
bacterioplankton
incorporation into DNA, 1977
Toluene
induction and uptake, 2193
mixed methanogenic cultures
transformation, 254
Tomatoes
*P. syringae* pv. *tomato*
copper resistance plasmid, 454
*Torulaspora delbrueckii*
artificial diploids
induction and characterization, 1504
industrial application, 1512
*Torulopsis glabrata*
susceptibility in the presence of six antifungal agents
determination by comparison of growth at several pHs, 593
Toxigenicity
*C. botulinum* types A and B
effects of irradiation, 201
Toxins
*B. fibrisolvens* specific growth rate and toxin degradation in vitro
effects of several mycotoxins, 613
*B. sphaericus*
activation, 1333
*B. thuringiensis* subsp. *kurstaki*
trypsin digest fragment, 416
*C. botulinum*
type E toxin purification, 2827
*C. botulinum* type G
Swiss soil, 1880
delta-endotoxin
gene relatedness in *B. thuringiensis*, 2808
specificity in *B. thuringiensis*, 500
enterotoxin
*S. aureus* strains, 2675
exotoxin A
improvement of yield, 2013
glycoprotein toxin
lectinlike mosquito receptor, 2650
ochratoxin A
detection, 514
parasporal bodies
*B. thuringiensis* subsp. *israelensis* and *B. thuringiensis* subsp. *morrisoni*, 1251
staphylococcal enterotoxin A
production in mixed cultures, 2271
T-2 toxin
effect on growth of ruminal bacteria, 587
metabolism by ruminal bacteria, 587
*V. parahaemolyticus*
production, 2696
Transduction
plasmids
freshwater environment, 987
Transfection
*Micromonospora* spp., 2544
*S. lactis*
protoplasts, 2583
Transformation
*S. lactis*, 1730
protoplasts, 2583
Transmission electron microscopy
*C. thermocellum*
cellulolytic enzyme complex, 2785
Transport mechanisms
deep-sea bacteria
glucose transport, 527
*L. acidophilus*
betaine transport, 2275
marine bacteria
cyclic AMP, 2963
L-methionine transport
stimulation by $Na^+$, 2159
*S. bovis*
disaccharides, 2388
*S. cerevisiae*
monocarboxylate transport, 509
*S. cremoris*
dipeptides, 2897
Transposon mutagenesis
*A. brasilense* Sp7
insertion mutant analysis, 410

*A. lipoferum* SpBr17
insertion mutant analysis, 410
Transposons
*B. japonicum*
attachment to host roots, 1959
conjugative transposon Tn*916*
Tn*5* insertions, 1069
*S. lactis* subsp. *diacetylactis* 18-16
transposon Tn*919* delivery system, 74
Tremorgenic mycotoxins
*A. fumigatus*
health problem, 787
Triacetoxyscirpenol
*F. sambucinum* NRRL 13495
preparation, 457
1,1,1-Trichloro-2,2-bis(4-chlorophenyl)ethane
*P. chrysosporium*
biodegradation, 2001
Trichloroethylene
biodegradation
aromatic biodegradation pathway, 949
*Trichoderma reesei*
glycosylation
ethanol perturbation, 463
hypersecretion
ethanol perturbation, 463
Trichothecenes
antibodies
production and characterization, 17
deepoxy trichothecenes
preparation and characterization, 2821
*F. sporotrichioides*
comparative yields, 693
*S. atra*
aerosolized conidia, 1370
scirpentriol
preparation, 457
T-2 toxin
biosynthesis blockage, 1855, 1860
effect on growth of ruminal bacteria, 587
metabolism by ruminal bacteria, 587
triacetoxyscirpenol
preparation, 457
*Trifolium subterraneum*
nodulation by *R. trifolii*
influence of lime and phosphate, 2090
influence of phosphate, 2098
*Rhizobium* infection
systemic response, 1611
*Triticum aestivum*
P uptake
influence of fungi, 2699
"Type 021N" bacteria
ultrastructure, 1560

Ultrastructure
*Thiothrix* spp., 1560
"type 021N" bacteria, 1560
Unattached bacteria
growth determinations, 2991
Uranium mines
Nordic Uranium Tailings Deposit
iron-oxidizing bacteria, 846
Urea
dietary supplement
protein degradation by ruminal microorganisms, 751
Ureolytic bacteria
effect of Aureo SP250, 2009
effect of clinoptilolite, 2009
effect of dietary copper sulfate, 2009
UV photography
aflatoxin-producing molds
screening, 230
UV radiation
*C. jejuni*
susceptibility, 375
*L. pneumophila*
killing in a plumbing system, 447
*Y. enterocolitica*
susceptibility, 375

Vaccines
immunized calves
challenge hypersensitivity, 1721
Vaginal microflora
tampon use
qualitative assessment, 2779
quantitative assessment, 2774
Vermiculite
direct fermentation
bacterial inoculant production, 2138
Vesicular-arbuscular mycorrhizal fungi
*G. fasciculatus*
hyphal elongation, 1928
identification, 2222
*L. leucocephala*
mycorrhizal dependency, 797
wheat and field beans
increased P uptake, 2699
Viability
*A. parasiticus*
reduction by sodium bicarbonate, 2303
direct viable count
cell metabolic activity, 2889
fragile phytoplankton
flow cytometric analysis, 2677
*G. muris* cysts
determination, 704
*Vibrio cholerae*
enumeration in Bangladesh waters, 2862
incidence
U.S. West Coast estuaries, 1344
rapid presumptive identification
multitest medium, 1203
recovery from oysters
elevated temperature method, 1181
selective and differential medium, 2262
survival at low temperature
effects of chitin and its soluble derivatives, 603
*Vibrio fischeri*
metabolizable-compound transport
variation in $Na^+$ requirements, 1487
*Vibrio parahaemolyticus*
*E. coli lac* genes
salt tolerance, 466
environmental strains
hemolytic activity, 2696
lethal toxin production, 2696
*proBA* genes
characterization, 2733
sewage-polluted sediments
distribution, 1756
*Vibrio* spp.
attachment to stainless steel
influence of alginate, 1175
*Vibrio vulnificus*
identification of marine isolates
DNA probe, 193
isolation from shellfish, 1556
selective and differential medium, 2262
virulent strains
U.S. West Coast estuaries, 1349
*Vigna* spp.
influence of *B. japonicum* hydrogenase on growth, 610
Viili
*S. lactis* subsp. *lactis*
construction of strains, 1385
Viologen dyes
*C. acetobutylicum*
alteration of electron flow, 1232
Viruses
artificial wetlands, 731
coxsackieviruses
inactivation during sewage sludge treatment, 2077
cricket paralysis virus
olive fruit fly control agent, 142
hepatitis A virus
A-ELISA, 1192
detection, 2487
FRhK-4 cell pathology, 2967
human rotavirus strain Wa
antigenicity reduction rates, 1803
infectivity in fresh waters, 1803
human T-lymphotropic virus type III/lymphadenopathy-associated virus
inactivation, 708
inactivation by ozone, 2218
nuclear polyhedrosis virus
survival, 2771
parvoviruses
inactivation during sewage sludge treatment, 2077
poliovirus
recovery from oysters, 2666
rotavirus
detection, 761
Jerusalem wastewater survey results, 761
recovery from oysters, 2666
rotaviruses
inactivation by ozone, 2218
inactivation during sewage sludge treatment, 2077
physicochemical stability and inactivation, 727
sewage sludge
characterization of virucidal agents, 621
sewage sludge treatment
inactivation, 2077
sewage-polluted waters, 1632
Vitamins
*Methanococcus* spp.
nutrition, 2373

W3A1
pyrroloquinoline quinone
production, 2183
Washwater
bacterial survival and transport, 2060
Waste treatment
*E. coli* HB101
mobilization of plasmid pHSV106, 665
Wastewater
ozonation
*E. coli* recovery, 2894
rotavirus detection
comparison of methods, 761
Jerusalem wastewater survey results, 761
treatment
influence of surfactants, 2567

Wastewater reservoirs
nitrifying bacteria, 754
Water
*B. fragilis* bacteriophages, 1632
bacteriophages, 1632
*Campylobacter* spp.
correlation with indicator bacteria, 523
seasonal occurrence, 523
coliform analysis
hydrophobic-grid membrane filter procedure, 1003
*Cryptosporidium* sp.
detection, 687
dissolved organic carbon
bacterial growth, 482
hepatitis A virus
detection by A-ELISA, 1192
*Klebsiella* spp.
enumeration, 1716
*L. pneumophila*
killing in a plumbing system, 447
legionellae
sampling protocol, 1454
sensitivity to isolation, 2704
oil field core flood experiments
slime-producing bacteria, 278
*Pseudomonas* spp.
isolation with selective medium, 895
renal dialysis water system
bacterial colonization, 1322
endotoxin content, 1322
rotavirus detection
comparison of methods, 761
Jerusalem wastewater survey results, 761
sludge methanogenesis
inhibition by long-chain fatty acids, 403
trichloroethylene
biodegradation, 949
*V. cholerae*
rapid presumptive identification, 1203
*V. cholerae* O1
enumeration, 2862
wetlands
viruses, 731
Wetlands
sulfate reduction in peat, 1406
viruses, 731
Wetting agents
*S. marcescens*
defective mutants, 1186
Wheat
P uptake
influence of fungi, 2699
rhizosphere bacteria
identification and characterization, 2793
Wheat straw
anaerobic rumen fungus
cellulases and xylanase, 1216
*Pleurotus* spp.
delignification, 1304
Whey
biomethanation
microbial ecophysiology, 1147
White rot fungi
wood degradation
cytochemical studies, 2384
White-tailed deer
offshore islands
prevalence of *B. burgdorferi* and *B. microti*, 892
Wine
fermentation
killer yeasts, 2171
Wine making
*S. lactis*
malolactic fermentation mutants, 320
Wood degradation
cytochemical studies, 2384
Wood-trimmers' disease
*A. fumigatus*
tremorgenic mycotoxins, 787

Xanthomonads
auxin production, 1839
*Xanthomonas* sp. strain 99
lignin degradation, 2242
Xenobiotic compounds
adaptation by microbial communities, 2212
benzenesulfonates
microbial desulfonation, 1459
chlorobenzene
utilization, 2470
3-chlorobenzoate
metabolism, 1846
*p*-chlorophenol
fate in test systems, 1833
DDT
degradation, 2001
degradation
microbial communities, 2212
second-order rate coefficients, 1064
7,12-dimethylbenz[*a*]anthracene
stereoselective fungal metabolism, 2560
naphthalenesulfonates
microbial desulfonation, 1459
nitrosubstituted aromatic compounds
nitrogen source for bacteria, 208
Xylan
fermentation by *B. fibrisolvens*, 2849
Xylanase
anaerobic rumen fungus
growth on various substrates, 1216
*B. succinogenes*
gene cloning and expression, 477
*C. acetobutylicum* ATCC 824
purification and characterization of two endoxylanases, 644
Xylanolytic bacteria
*C. acetobutylicum* ATCC 824
isolation and some properties of a β-D-xylosidase, 651
purification and characterization of two endoxylanases, 644
pigs
dietary fiber, 22
*o*-Xylene
*P. stutzeri*
degradation, 2129
D-Xylose
*E. chrysanthemi*
fermentation to ethanol, 2033
*K. planticola*
fermentation to ethanol, 2039
Xylose isomerase
gene from *E. coli*
expression in *S. cerevisiae*, 1996
β-D-Xylosidase
*C. acetobutylicum* ATCC 824
isolation and some properties, 651
Xylulokinase
cloning of gene, 2975

Yeasts
*C. albicans*
survival in marine and fresh waters, 1762
*C. boidinii*
isolation and characterization, 1812
*C. pintolopesii* 108-1
mitochondrial DNA, 345
cell membranes
adaptation to ethanol, 1196
extracellular proteinases
brewing, 495
glycerol accumulation
osmotic significance, 2119
Grape sour rot
analysis of associated yeast flora, 571
analysis of chemical disease markers, 571
killer yeasts
wine fermentation, 2171
*P. tannophilus*
xylulokinase gene cloning, 2975
*R. mucilaginosa*
acetylxylan esterase, 2831
*S. cerevisiae*
autoconditioning factor, 33
ethanol production, 1286
monocarboxylate transport, 509
xylose isomerase gene expression, 1996
*T. delbrueckii*
artificial diploids, 1504, 1512
*T. glabrata*
susceptibility in the presence of six antifungal agents, 593
*Yersinia enterocolitica*
chlorine injury
reduced invasiveness, 1358
copper and chlorine stress
survival and virulence, 1768
UV radiation
susceptibility, 375

*Zea mays*
*P. fluorescens*
attachment to roots, 1397
*Zymomonas mobilis*
acetaldehyde production, 2815
alcohol production
increased rate, 1425
expression vector, 235
